Similarly, the author of the original book, Naoki Hyakuta, disagreed with this line of criticism, stating in a tweet that "In my book Eternal Zero, I opposed suicide attacks with determination", "I have never ever viewed wars in a positive light", and the theme of the book was "not to allow our memories of war to fade away".

Excavating the power of memory offers a succinct examination of how memory is constructed, embedded and disseminated in contemporary Japanese society. The unique range and perspective of this collection will provide an understanding not found elsewhere. It starts with a lucid introduction of how memory plays a political and wider social role in Japan. Four case studies follow. The first takes up the divergence in memory at the national and subnational levels by analysing the memory of the battle of Okinawa and US military accidents in Okinawa prefecture, illuminating how memory in the prefecture embeds Okinawans as victims of mainland Japan and of the United States. The second explores whether Japan ’ s membership of the International Criminal Court represents a shift in the Japanese government ’ s negative remembrance of the International Military Tribunal for the Far East, demonstrating how both courts are largely portrayed as being disconnected in political debates. The third offers an analysis of the surviving letters of the Kamikaze pilots in order to interrogate and compare their presumed identity in the dominant collective memory and their own self-identities. The fourth untangles how the ’ memory of winds ’ in Japanese fishing communities remains an expression of social thought that presides over the ’ transmission of meaning ’ about fishermen’s geographical surroundings. This book was previously published as a special issue of the Japan Forum.

Your grandfather was a coward. That is the angry recollection with which a former Zero fighter pilot greets two Japanese siblings who, typically, despite being educated, know next to nothing about a defining war in the Pacific that took place within living memory. The testimony rattles and confuses aspiring lawyer Kentaro and newly minted journalist Keiko since virtually the only fact they ’ ve grown up hearing about Kyuzo Miyabe is that he died a kamikaze. When the young pair digs deeper into the man ’ s past, other surviving comrades only seem to confirm the verdict, but its very import begins to shift in surprising ways. In addition to providing a window into the experiences of the losing side ’ s flyboys and a frank look at contemporary Japan ’ s amnesia regarding the war, this novel also undertakes a blistering critique of the folly and inhumanity of the Imperial Navy and Army and a nuanced exploration of the differences between kamikaze pilots and today ’ s suicide bombers. At its core, however, it is a mystery of sorts about a long-dead man ’ s actions and intentions and a reconfiguration of the meaning of wartime loyalty and sacrifice. A debut novel that was published when the author was fifty, The Eternal Zero has become Japan ’ s all-time top-selling mass-market paperback and the basis of a blockbuster film of the same name.

Contents tourism is tourism induced by the contents (narratives, characters, locations and other creative elements) of films, novels, games, manga, anime, television dramas and other forms of popular culture. Amidst the boom in global interest in Japanese popular culture, the utilization of popular culture to induce tourism domestically and internationally has been central to the "Cool Japan" strategy and, since 2005, government policy for local community revitalization. This book presents four main case studies of contents tourism: the phenomenon of "anime pilgrimage" to sites appearing in animated film; the travel behaviours and "pop-spiritualism" of female history fans to heritage sites; the collaboration between local community, fans and copyright holders that underpinned an anime-induced tourism boom in a small town north of Tokyo; and the large-scale economic impacts of tourism induced by NHK ’ s annual samurai period drama (Taiga Drama). It is the first major collection of articles published in English about media-induced tourism in Japan using the "contents tourism" approach. This book will be of particular interest to students and researchers of media and tourism studies in Asia. This book was previously published as a special issue of Japan Forum.

Japan was shaken by the 'double disaster' of earthquake and sarin gas attack in 1995, and in 2011 it was hit once again by the 'triple disaster' of earthquake, tsunami, and nuclear meltdown. This international, multi-disciplinary group of scholars examines the state and societal responses to the disasters and social crisis.

Japanese "new religions" (shinsh ky) have used various media forms for training, communicating with members, presenting their messages, reinforcing or protecting the image of the leader, and, potentially, attracting converts. In this book the complex and dual relationship between media and new religions is investigated by looking at the tensions groups face between the need for visibility and the risks of facing attacks and criticism through media. Indeed media and new technologies have been extensively used by religious groups not only to spread their messages and to try to reach a wider audience, but also to promote themselves as a highly modern and up-to-date form of religion appropriate for a modern technological age. In 1980s and early 1990s some movements, such as Agonsh , K fuku no Kagaku, and Aum Shinriky came into prominence especially via the use of media (initially publications, but also ritual broadcasts, advertising campaigns, and public media events). This created new modes of ritual engagement and new ways of interactions between leaders and members. The aim of this book is to develop and illustrate particular key issues in the wider new religions and media nexus by using specific movements as examples. In particular, the analysis of the interaction between media and new religions will focus primarily on three case studies predominantly during the first period of development of the groups.
