The way you line these marks up is easy if you take the time. First, if you are changing the timing belt you pull the balancer and both top and bottom plastic covers.(do not try to pull top cover off before you take off balancer and the motor mount off or you will just break it.). Second after covers are removed you will have access to the timing belt, you can now remove it by loosening the tensioner bolt and pushing down on the tensioner wheel, the belt then can be taken off.
