Another type of backfire that can occur in a 23 HP Kawasaki engine is caused by having a poorly tuned carburetor. If the carburetor isn't working properly, it can get the mixture of fuel and air in the incorrect ratio. Sometimes, too much fuel is delivered to the combustion cylinders for a given amount of air. This is called running rich.

Kross Karmer is wedged between faith and fear. After surviving a traumatic event that headlined her city's newspaper, the multi-talented beauty is unable to withstand large crowds and is paralyzed by the thought of history repeating itself. Shielding her mental stability and tucking away the will to rejoin the world, Kross becomes accustomed to her hermit lifestyle. However, with family, friends and a new delivery man vying for her affection; the eclectic music columnist has begun to wonder, is her lonely more peaceful than love?Hollis Brown is seemingly satisfied with last occupying the space for intimacy. Years of twisted betrayal and deceitful partners have emptied the businessman's patience and faith in women. Outside of his daughter and Brown Brothas, nothing else matters. And yet, a lucrative wager amongst friends shifts the stern boss's focal and reintroduces second chances to a man who doesn't usually believe in re-dos.Both canvassing between intuition and insecurities, will Kross and Hollis be able to find solace in the space between?

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
