speed gearbox, the engine produced 244bhp at 6000rpm and 228lb ft at ...

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

You're a Mitsubishi DSM or Evolution owner and you want to know how to improve your car's performance even more? EVOLUTIONISTIC! David Peterson's *Modifying Your Mitsubishi Powered DSM & EVOs 4G63 a Honda Hunter and V8 Eater* is the book you need. David Peterson knows cars. He rebuilt his first engine at the age of 16, has been a mechanic since he was 20, and he now runs an auto service repair facility and owns a car dealership, and he's just as obsessed with DSMs and EVOs as you are. *Modifying Your Mitsubishi Powered DSM & EVOs 4G63 a Honda Hunter and V8 Eater* is more than just an invaluable guide to upgrading your car: it brings together the past, present and future of this class of racing. It's also a history of the Diamond Star Motors (DSM) brand, up to and beyond the EVO, and of Buschur Racing. The book also includes information about the newest Mitsubishi Evolution IX, glossy pictures of some of the best-known cars on the circuit, and details on the great names who race in this class. So if you're an enthusiast of these gorgeous muscle cars, get this book, get out on the track, and get into first place. This is a must-have book for racing enthusiasts.

How to Build Max-Performance Mitsubishi 4G63 Engines covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, however, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and
