major male sex hormone. It regulates body changes during puberty and influences sperm production. •The scrotum is a sac containing the testes. Muscles

Chapter 18 Section 1 Male Reproductive System What the ...
Introduction to the Reproductive System. The major function of the reproductive system is to ensure survival of the species. Other systems in the body, such as the endocrine and urinary systems, work continuously to maintain homeostasis for survival of the individual. An individual may live a long, healthy, and happy life without producing offspring, but if the species is to continue, at least ...
