Doing some research, [Ted] found it takes approximately 2,000 W to 3,000 W at 14 V to start the average car engine. This is obviously far in excess of what a coin cell can put out instantaneously ...

Coin Cell Challenge: Jump Starting A Car

[Josh] has written up two posts that those of you who use AVR's might find handy. The first post documents a C library that implements a jitter-free one-shot timer. The second post explains how it ...

AVR Hardware Timer Tricked Into One-Shot

Every one of those cars were white and powered by a six-cylinder engine. Since 1955, all Corvettes have had V-8 power. Throughout the model's history, all Corvettes have been two-seaters ...

Chevrolet Corvette

I gave the reliability rating 4 stars only because it did have an issue with engine cooling (fan motors blew out) that is apparently not an isolated issue. This is something to consider ...
