Routing in MANETs  
is the constant  
movement of nodes or  
node mobility

Disruption and frequent  
path breaks occur due to  
the movement of  
intermediate nodes in  
the path and end nodes.  
Efficient mobility  
management for  
dynamic MANETs  
should be an important  
feature for routing

# Access Free A Survey Of protocols in MANETs. And Ociated Routing Issues in Mobile Ad Hoc Networks: A Survey

In this paper, survey on routing metrics and satellite networks routing protocols is presented. Routing protocols for Satellite Networks are classified based on QoS, multicast, and

# Access Free A Survey Of

multipath. The routing is done by using algorithms like ATM and switching, satellite network topology can be divided into a series of fixed slices on which the terrestrial routing algorithms can be applied.

# Access Free A Survey Of Routing Issues ...

There are many issues of MANETs that makes QoS based multicast routing a challenging task for research community. Some of these issues are summarized as follows [13, 14, 18]: i)

**Robustness:** Link failures are very common issue in Ad hoc networks due to

# Access Free A Survey Of

high mobility of nodes,  
which results in a low  
packet delivery ratio.

## A Survey of Issues in Supporting QoS based Multicast ...

One of the major  
challenges in a  
MANET, is to design  
the robust routing  
algorithms. Routing is  
an essential and major  
concern for effective

# Access Free A Survey Of

and reliable Issues

communication between  
mobile nodes in a

MANET. We present a

survey of the main types

of routing protocols and

some security related

issues of MANETs.

Security Issues in

MANET: A Survey ...

In the following, a

survey of MAC routing

# Access Free A Survey Of

mechanisms in WSN is presented and discussed. One of the most important issues in WSN is the issue of energy efficiency of the routing protocols. The importance of this issue stems from the fact that the nodes have usually a life time and this life time can be extended by saving more energy by using efficient routing
