A Treatise Of Human Nature

A Treatise of Human Nature (1739–40) is a book by Scottish philosopher David Hume, considered by many to be Hume's most important work and one of the most influential works in the history of philosophy. The Treatise is a classic statement of philosophical empiricism, skepticism, and naturalism. In the introduction Hume presents the idea of placing all science and philosophy on a novel ...

Berkeley, and Hume is associated with these two men as the third in the series of great British empiricists. Like Hume, Locke denied the existence of innate ideas, dividing the sources of our ideas into two categories: those derived from sensation through the use of our sense organs and those derived from reflection through our own mental processes.

---

David Hume (Stanford Encyclopedia of Philosophy)

In *A Treatise of Human Nature* (1739–40), he points, almost as an afterthought, to the fact that writers on morality regularly start by making various observations about human nature or about the existence of a god—all statements of fact about what is the case—and then suddenly...
