*Ten-year-old Albie has never been the smartest, tallest, most athletic, greatest artist, or most musical in his class, as his parents keep reminding him, but new nanny Calista helps him uncover his strengths and take pride in himself. Simultaneous eBook.*

From the author of the National Book Award nominee A TANGLE OF KNOTS comes an inspiring novel about figuring out who you are and doing what you love. Albie has never been the smartest kid in his class. He has never been the tallest. Or the best at gym. Or the greatest artist. Or the most musical. In fact, Albie has a long list of the things he's not very good at. But then Albie gets a new babysitter, Calista, who helps him figure out all of the things he is good at and how he can take pride in himself. A perfect companion to Lisa Graff's National Book Award-nominated A Tangle of Knots, this novel explores a similar theme in a realistic contemporary world where kids will easily be able to relate their own struggles to Albie's. Great for fans of Rebecca Stead's Liar and Spy, RJ Palacio's Wonder and Cynthia Lord's Rules. Praise for Lisa Graff's novels Tangle of Knots (nominated for a National Book Award) \* "Combining the literary sensibility of E. B. White with the insouciance of Louis Sachar, Graff has written a tangle that should satisfy readers for years to come."--Booklist, starred review Double Dog Dare "Graff's...story is lighthearted and humorous, but honestly addresses the emotions associated with divorce. Her characters' voices, interactions, and hangups are relatable, as they battle each other and adjust to their families' reconfigurations."--Publishers Weekly

Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, The Absolutely True Diary of a Part-Time Indian, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

A National Book Award nominee! The magic of Sassy meets the complexity of When You Reach Me in this "blithe magical puzzle." --The Wall Street Journal Told in multiple viewpoints, A Tangle of Knots is a magnificent puzzle. In a slightly magical world where everyone has a Talent, eleven-year-old Cady is an orphan with a phenomenal Talent for cake baking. But little does she know that fate has set her on a journey from the moment she was born. And her destiny leads her to a mysterious address that houses a lost luggage emporium, an old recipe, a family of children searching for their own Talents, and a Talent Thief who will alter her life forever. However, these encounters hold the key to Cady's past and how she became an orphan. If she's lucky, fate may reunite her with her long-lost parent. Lisa Graff adds a pinch of magic to a sharply crafted plot to create a novel that will have readers wondering about fate and the way we're all connected.

Includes questions for discussion and an excerpt from: A clatter of jars.

You've never seen a Francisco X. Stork novel like this before! A missing girl, a determined reporter, and a young man on the brink combine for a powerful story of suspense and survival.

When Kansas Bloom moves to California and joins the Media Club at school, he soon finds himself trying to outdo one of the other fourth-grade students in a "dare war" while vying for the job of on-air video homeroom announcer.

*How to Win a Dare War*

THE INSTANT #1 NEW YORK TIMES BESTSELLER "Sparkling with mystery, humor and the uncanny, this is a fun read. But beneath its effervescent tone, more complex themes are at play." —San Francisco Chronicle In his wildly entertaining debut novel, Hank Green—cocreator of Crash Course, Vlogbrothers, and SciShow—spins a sweeping, cinematic tale about a young woman who becomes an overnight celebrity before realizing she's part of something bigger, and stranger, than anyone could have possibly imagined. The Carls just appeared. Roaming through New York City at three a.m., twenty-three-year-old April May stumbles across a giant sculpture. Delighted by its appearance and craftsmanship—like a ten-foot tall Transformer wearing a suit of samurai armor—April and her best friend, Andy, make a video with it, which Andy uploads to YouTube. The next day, April wakes up to a viral video and a new life. News quickly spreads that there are Carls in dozens of cities around the world—from Beijing to Buenos Aires—and April, as their first documentarian, finds herself at the center of an intense international media spotlight. Seizing the opportunity to make her mark on the world, April now has to deal with the consequences her new particular brand of fame has on her relationships, her safety, and her own identity. And all eyes are on April to figure out not just what the Carls are, but what they want from us. Compulsively entertaining and powerfully relevant, An Absolutely Remarkable Thing grapples with big themes, including how the social internet is changing fame, rhetoric, and radicalization; how our culture deals with fear and uncertainty; and how vilification and adoration spring for the same dehumanization that follows a life in the public eye. The beginning of an exciting fiction career, An Absolutely Remarkable Thing is a bold and insightful novel of now.

One of the world's most beloved and bestselling writers takes his ultimate journey -- into the most intriguing and intractable questions that science seeks to answer. In A Walk in the Woods, Bill Bryson trekked the Appalachian Trail -- well, most of it. In In A Sunburned Country, he confronted some of the most lethal wildlife Australia has to offer. Now, in his biggest book, he confronts his greatest challenge: to understand -- and, if possible, answer -- the oldest, biggest questions we have posed about the universe and ourselves. Taking as territory everything from the Big Bang to the rise of civilization, Bryson seeks to understand how we got from there being nothing at all to there being us. To that end, he has attached himself to a host of the world's most advanced (and often obsessed) archaeologists, anthropologists, and mathematicians, travelling to their offices, laboratories, and field camps. He has read (or tried to read) their books, pestered them with questions, apprenticed himself to their powerful minds. A Short History of Nearly Everything is the record of this quest, and it is a sometimes profound, sometimes funny, and always supremely clear and entertaining adventure in the realms of human knowledge, as only Bill Bryson can render it. Science has never been more involving or entertaining.
