of tobacco smoke on smokers are well defined. However, the effects on non-smokers are not so clear. Which of the many diseases, cancers, and pathologies that are certainly associated with smoking are also induced by tobacco smoke in non-smokers? What

are the effects on  
non-smokers of  
smoking bans in the

Environmental

brings together in

The book also  
examines the role  
of ETS in bringing  
about other  
maladies such as  
DNA damage, gene

immunosuppression  
. The materials also

Environmental

also probes the role  
of the political and  
legal systems in  
modifying

Ventilation, exposure  
risks, and health

ETS. The book also  
summarizes the role  
of antioxidant  
supplements in  
lowering ETS  
damage and the  
usefulness of  
animal models in  
refining the  
precision of studies.  
Clearly,

tobacco smoke poses significant health risks. It is also abundantly clear that these risks can be eliminated. It is even more obvious that, in order to establish effective prevention mechanisms, we need to define the
