Books Name: Design Example of a 05 Storey Building according to ACI 318.

Author: Andrew bartolini.

Every student and teachers in the field of civil and structural engineering should know a details of building design. But most of us know the basic things of a building design but due to proper guidance and textbooks we fail a design a complete building. This book follows ACI 318-11 code.

ACI 318 Section 15.4 defines how flexural reinforcement is to be distributed for footings of various shapes. Section 10.5 of ACI 318 prescribes the minimum reinforcement for flexural members where tensile reinforcement is required by analysis.

### ~~Foundation Analysis and Design~~

In addition to design, this guide discusses soil-support systems; shrinkage and temperature effects; cracking, curling or warping; and other concerns affecting slab design. Although the same general principles are applicable,

## ~~318-11 Building Code Requirements for Structural Concrete ...~~

In the 2014 edition of ACI 318, a new chapter devoted to the design and detailing of reinforced concrete diaphragms was included for the first time. The purpose of this Design Guide is to provide explanatory material based on the provisions of that chapter for diaphragms in buildings assigned to any Seismic Design Category.

Section 2.2. Concrete  
Materials. Last Revised:  
04/07/2018 It is assumed  
that you have a fundamental  
understanding of concrete  
and concrete mix design from  
prerequisite courses, so  
this is largely a summary of  
those principles plus a view  
of the ACI 318-14 provisions  
that govern the selection of  
concrete materials.
