(CCEA ...*

Many of the acids that we do not consume in the household are used in the laboratories and industries, which include an acid such as HCl, H₂SO₄ etc. and bases such as NaOH, KOH etc. When these acids and bases are mixed in the right proportions, the neutralization reaction thus results in the formation of salt and water. Some naturally occurring salts

Salts are formed by the combination of acid and base through the neutralization reaction. The acidic and

Acces PDF Acids Bases And Salts Pre Test Answers

basic nature of salts usually depends on the acid and base from which the salt evolved in neutralization reaction. Example: $\text{NaOH} + \text{HCl} \rightarrow \text{NaCl} + \text{H}_2\text{O}$

Acids Bases and Salts / Properties of Acids, Bases and Salts

The salts of strong acids and strong bases are generally neutral. e.g. NaCl (from NaOH and HCl), K_2SO_4 (from KOH and H_2SO_4)

The salts of strong acids and weak bases are acidic salts. e.g. ZnSO_4 (from H_2SO_4 and Zn(OH)_2) The salts of weak acids and strong bases are basic salts. e.g. Na_2CO_3 (from H_2CO_3 and
