Paint, Pigment, Solvent, Coating Paint, Additives and Formulations
Hank Book is published by EIRI Consultants & Engineers. As these all paint and all edi products have got good demand in India and also having export, potential. The invaluable book is covering depth manufacturing technology with various formulae on different paint items. The book covers various methods including Flavours and Its Study, Changes of Food Flavours Due to processing, Flavouring Materials Made by Processing, Natural Flavouring Materials, Flavouring Materials of Natural Origin, Manufacturing Technology of Flavours, Food Colourants. The book has been written for the benefit and to prove an asset and a handy reference guide in the hands of new entrepreneurs and well established industrialists. The book Paint, Pigment, Solvent, Coating, Emulsion, Paint Additives and Formulations' covers various methods including Paint Additives, Solvents, Pigments, How to Formulate a Paint, Inhibitive Primers for Metal, Paints for Ships, Drying and Curing Additives, Light Stabilizers, Foam Control Additives, Additives for Powder Coatings, Calcium Aluminium Silicate and Magnesium Aluminium Silicate, Paint Stainers, Painting of Aircraft, Anionic Bitumen Emulsions, Rheology Modifiers in Waterborne Paints, High Performance Coatings, Bio-Diesel-Opportunities for the Coating Industry, Road Marking Paints, Emulsions, Silica Gels, Emulsion Paints, Paints and Varnish Removers, Spray Painting, Paint Bases, Paint, Varnish and Enamel Removers, Paint Mixing and Grinding, Pigments Formulae. The book has been written for the benefit and to prove an asset and a handy reference guide in the hands of new entrepreneurs and well established industrialists.

Some projects give you high impact on a low budget and major improvements with only a minor time commitment. Weekend Improvements is packed with those kinds of projects. From saving energy and maximizing storage space to quick makeovers and money-saving repairs, this book is filled with great ideas for any home, indoors and out. Whether you are a DIY veteran or just getting started, our step-by-step instructions and detailed how-to photos make projects easy. Plus, every project includes tips from hands-on pros to help you get it done faster and better.

The book covers Ammonia, Aluminium, Chlorine and Sodium Hydroxide, Cosmetics and Perfumes, Dyes, Enamels, Explosives, Glass and Alkali Silicates, Gyps um, Glass Fibres, Optical Fibres and Mineral Fibres, Industrial Chemicals from Benzene, Industrial Chemicals from Toluene, Industrial Chemicals from Xylenes, Industrial Chemicals from Methene, Industrial Gases, Lime, Mineral Fertilizers, Preparation of Methanol, Magnesium, Nickel, Organic Dyes, Oils, Fats and Waxes, Petable Water, Pigments, Pesticides, Rubber, Sodium Carbonate and Sodium Bicarbonate, Silicones , Uranium, Zeolites, Zinc, Aluminium Ingots from Aluminium Scrap, Cosmetics Industry (Modern), Fibre Glass Sheets, Herbal Cosmetics, Hydrated Lime, Latex Rubber Condomes, Magnesium Carbonate, Magnesium Metal and Calcium, Mineral Water and Soda Water, N.P.K. Fertilizer, Nickel Sulphate, Oxygen Gas Plaster of Paris, Refined Oils, Cotton Seed Oil, Groundnut Oil, Sunflower and Safflower Oil, Sodium Bicarbonate (Baking Soda) from Soda Ash, Single Super Phosphate, Toluene and SBP From Crude Naphtha, Zeolite-A Manufacturing (Detergent Grade), Zinc Oxide, Zinc Metal From Zinc Ash. visit www.eirindia.org www.eiri.in

According to one study, there are more than 250 races of corn inabout 14 racial groups. Maize or Corn products have got tremendous demand in India and in overseas countries. Now-a-days many eatable products are being produced from maize. To consider the demand of these products EIRI have recently published a unique book on its subjects. The book 'Technology of Maize and Allied Corn Products' covers various methods including Corn, Types of Corn, Botany of Corn, Cultivation Practices, Carbohydrats and Related Compounds, Quality Factors, Traditional Food Products from Corn, Corn Milling, Products and their Uses, Processing Ready-to Breakfast Cereals, Popcorn, Formulated Puffed Snacks, Manufacturing Corn Chips, Maize Products, Maize Starch, Sweet Corn, Baby Corn, Extruding Snacks, Corn Flakes, Liquid Glucose, Maize/Corn Oil, Malto Dextrin from Maize, Plant Economics of Non-Roasted Corn Flakes (POHA), Starch from Maize, Snack Food, Yeat Dry Powder from Maize, Suppliers of Maize/Corn Processing Machineries, Present Manufacturers/Exporter/Suppliers of Maize and Maize Products

The Book Covers Drugs And Cosmetics Acts And Rules, Most Commonly Used Cosmetics Raw Materials, Hair Structure And Its Chemistry, Hair Shampoos, Hair Tonics And Conditioners, Hair Wave Sets, Lacquers And Rinses, Hair Grooming Preparations, Permanent Hair Waving Preparations And Hair Straighteners, Hair Bleachers And Hair Colourants, Depilatories, Shaving Soaps & Creams, Skin Creams & Lotions, Suntan & Anti Sunburn Preparations, Skin Bleach Creams, Astringents & Skin Tonics, Antiperspirants & Deodorants, Face Powders & Other Coloured Make-Up Preparations, Body Powders (Talcum Powders), Face Packs And Masks, Nail Lacquers And Removers, Toothpastes, Tooth Powders, Mouthwashes, Hair Oils & Hair Lotions, Preservation Of Cosmetics, Plant & Equipment For Herbal Cosmetics Manufacture, Packaging Of Herbal Cosmetics, Miscellaneous Formulae, Indigenous Materials & Technologies For Herbal Cosmetics, Present Manufacturers, Suppliers Of Plant & Equipments, Cosmetics Consultants, Raw Materials & Chemicals Manufacturers/Suppliers, Manufacturers/Raw Materials Suppliers Of Herbs/Plants And Their Extracts Etc.

Extruded Snacks, Health Food Snacks, Snack Food Preservatvo & Packaging, Details Of Plant, Machinery & Equipments, Instant Noodles, Namkeen, Namkeen & Sweets, Potato Products. Manufacturers Of Plants & Machineries Of Snacks Food, Manufacturers Of Machineries Of Papped Plants, Manufacturers Of Plant & Machineries Of Namkeen, Manufacturers Of Raw Materials, Suppliers Of Packaging Materials. Potato, Pappad & Barian Plant, Potato Waffers, Potato Chips, Packaging Of Snack Foods.

Databook of Antiblocking, Release, and Slip Additives, Second Edition contains detailed information on over 300 important additives for polymers, including additives that are used to minimize adhesion, aid separation, and enhance processing and end-applications for polymers. Each additive is presented with data in the following categories: General Information, Physical Properties, Health and Safety, Ecological Properties, and Use and Performance. Data fields covered include state, odor, color, autoignition temperature, probability of biodegradation, and much more. Recommendations are given for specific products, processing methods, and mold materials, and an assessment is given for each additive's features and benefits. Contains the most extensive data available on a large number of antiblocking, release and slip additives for polymers
Features 130 data fields for each additive that are divided into General Information, Physical Properties, Health and Safety, Ecological Properties, and Use and Performance
Includes an assessment of the benefits and properties of each additive, recommended dosages and processing methods

The Ecology of Building Materials explores key questions surrounding sustainability of building materials. It provides technical data to enable design and building professionals to choose the most appropriate materials for a project: those that are least polluting, most energy efficient, and from sustainable sources. The book also gives information and guidance on a wide range of issues such as recycling, detailing for increased durability and Life Cycle Analysis. Berge's book, translated from the Norwegian by Chris Butters and Filip Henley, offers safe and environmentally friendly material options. It provides an essential and easy-to-use reference guide to this complex subject for the building industry professional. New to this edition:
• Thorough exploration of building materials in relation to climate change issues
• Extensive updating of basic data, as well as the introduction of a wide range of new materials
• Methods for recycling and reuse of materials
• More information on the interaction between materials and the indoor environment, ventilation and energy use
• Full colour text and user-friendly larger format
Björn Berge is a practicing architect, researcher and lecturer. Since the 1970s, he has written several books on building ecology for the Scandinavian public. He is one of the founders of Gaia Architects who have developed a wide range of pioneering techniques in sustainable building.

The Indian plastic and polymer industry has taken great strides. In the last few decades, the industry has grown to the status of a leading sector in the country with a sizable base. The material is gaining notable importance in different spheres of activity and the per capita consumption is increasing at a fast pace. Numerous plastics and fibers are produced from synthetic polymers; containers from propylene, coating materials from PVC, packaging film from polyethylene, experimental apparatus from Teflon, stockings from nylon fiber, there are too many to mention them all. The reason why plastics are popular is that they may offer such advantages as transparency, self lubrication, light weight, flexibility, economy in fabricating and decorating. Properties of plastics can be modified through the use of fillers, reinforcing agents and chemical additives. Silicones are by far the most important industrial polymers and are based on silicon, an element abundantly available on our planet. Polymers are classified in three broad groups; addition polymers, condensation polymers and special polymers. It is well known that the major consumption of additives is in PVC compounds. Approximately 80% of additives are being used in PVC; however the left over 20% is consumed in compounding of other thermoplastics. Plastic master batches and fillers have their own importance in plastic processing industries. Colorants are the materials that give colour and opacity to plastics are chemically characterized as either pigments or dyes. Pigments are finely pulverized natural or synthetic particles which may be of inorganic or organic origin and insoluble in the matrix in which they are dispersed. Permanent red 2B is a mono azo pigment that is widely used in thermoplastics because it is inexpensive and has high tinting strength and good bleed resistance. Fillers are commonly employed in opaque PVC compounds to reduce cost and to improve electrical insulation properties, to improve deformation resistance of cables, to increase the hardness of a flooring compound and to reduce tackiness of highly plasticized compounds. Various calcium carbonate are used for general purpose work, china clay is commonly employed for electrical insulation, and asbestos for flooring applications. Also employed occasionally are the silicas and silicates, talc, light magnesium carbonate and barites (barium sulfate). Polymer Energy system is an award winning, innovative, proprietary process to convert waste plastics into renewable energy. Polymers are the most rapidly growing sector of the materials industry. No wonder polymers are found in everything from compact discs to high tech aerospace applications. On the basis of value added, Indian share of plastic products industry is about 0.5% of national GDP. Some of the astonishing fundamentals of the book are industrial polymers, addition polymers polyolefins, polyethylene, chlorinated polyethylene, cross linked polyethylene, linear low density polyethylene (LLDPE), high molecular weight polyethylene, ultrahigh molecular weight polyethylene, polypropylene, poly(vinyl chloride), stabilizers, plasticizers, extenders, mineral filled or glass bead/milled glass grades, antistatic/electro conductive grades, electroplatable grades, etc. The present book enlightens the processing of industrial polymers, additives, colourant and fillers. This book is an invaluable resource to new entrepreneurs, technocrats, researchers, professionals etc.

Using crisp photos and drawings, Bollinger goes step by step through the process. You will learn how to estimate materials, select the right kind of wood, prepare the subfloor and achieve a blemish-free finish for an old or new floor. Bollinger also provides numerous tips and tricks, and sources of supply. The book is indexed for easy reference.
