Oral Medicine and Medically Complex Patients, Sixth Edition provides succinct, yet comprehensive information on in-hospital care and outpatient management of the medically complex dental patient, as well as the management of non-surgical problems of the maxillofacial region. Fully revised to include up-to-date information on procedures and medications, the Sixth Edition contains over 15 additional charts and tables for rapid reference and expanded coverage on maxillofacial prosthodontics and increasingly prevalent conditions, such as ONJ. Oral Medicine and Medically Complex Patients follows a practical approach, organizing essential information into quickly referenced tables, easy-to-read diagrams and step-by-step procedures. Replete with examples of hospital charts, operative notes, and consultations, the book provides thorough coverage of the broad scope of clinical problems and patient populations encountered by dentists. A truly must-have resource Oral Medicine and Medically Complex Patients serves the needs of an increasing number of dental students, residents in general practice and speciality training, and practitioners engaged in the care of both hospitalized and ambulatory patients.

Felicia was very happy today. The sun was shining, and she had a great day at school. She was able to answer almost all the questions in class. She had a great time playing with her friends, and even the lunch food was delicious!

The rather young field of research into electricity savings is attracting increasing attention since low electricity consumption is a vital component of environmentally sustainable development. The potential benefits from using less electricity, without sacrificing quality of life, are immense, as the book shows with case studies from Eastern and Western Europe and the USA. Saving electricity means that the expense of constructing scores of power plants can be saved, and that their economic and environmental impact will vanish. Audience: Can be read with profit by any graduate. Suitable as a reference work for Master's and Doctoral students, as well as for others working on environmental issues in general and electricity savings in particular.
