traditions of free markets and free trade. Asking why the poorest Africans haven't been able to prosper in the Twenty-first-century, Ayittey makes the answer obvious: their economic freedom was snatched from them. War and conflict replaced peace and the infrastructure crumbled. In a book that will be pondered over and argued about as much as his previous volumes, Ayittey looks at the possibilities for indigenous structures to revive a troubled continent.

the current toxic episteme – the Western dominant Grand Narrative that embeds, espouses and superimposes itself on others. It exhorts African scholars in particular to unite and address the bequests of colonialism and its toxic episteme by confronting the internalised fabrications, hegemonic dominance, lies and myths that have caused many conflicts in world history. Such a toxic episteme founded on problematic experiments, theories and praxis has tended to license unsubstantiated views and stereotypes of others as intellectually impotent, moribund and of inferior humanity. The book invites academics and intellectuals to commit to a healthy dialogue among the world 's competing traditions of knowing and knowledge production to produce a truly accommodating and inclusive grand narrative informed by a recognition of a common and shared humanity.

It revolves around demonetisation ' s objectives stated by the Government as a measure to attack on black Money, terrorism, counterfeit currency and making cash-less, further corrected to less-cash economy. The book weighed these stated objectives and assessed whether objectives will be achieved by this demonetisation. In addition to three Indian demonetisations, the book covers 18 demonetisations across the globe and 14 demonetisation-like events. Analysed demonetisation on the basis of cost-benefit analysis, the book has also covered impact of demonetisation on major industries like FMCG, Realty, Power, infrastructure, etc. and on prime economic indicators like GDP, GVA, CRR, repo rate, inflation, etc.

The Black Middle Ages examines the influence of medieval studies on African-American thought. Matthew X. Vernon focuses on nineteenth century uses of medieval texts to structure racial identity, but also considers the flexibility of medieval narratives more broadly in the medieval period, twentieth and twenty-first centuries. This book engages disparate discourses to reassess African-American positionalities in time and space. Utilizing a transhistorical framework, Vernon reflects on medieval studies as a discipline built upon a contended set of ideologies and acts of imaginative appropriation visible within source texts and their later mobilizations.
