In this course students will learn about a variety of advanced topics in algebra. Students will expand their understanding about functions by learning about polynomial, logarithmic, and trigonometric functions. These new functions along with linear, quadratic, and exponential, will be used to model a variety of problems, including compound interest, complex numbers, growth and decay ...

Common Core Algebra II - eMathInstruction

Just like Algebra I, it is obvious that the designers of Algebra 2 employed a systems approach to (1) meticulously identify all of the knowledge and skills required in an Algebra 2 course; (2) translate these into learning objectives for the course; (3) systematically identify course prerequisites (the starting point for the course); (4) specify final course outcome (the end point for the course); (5) sequence and repeat training to optimize learning and retention; and (6) design evaluation ...
