The “ I CAN Learn[R] Pre-Algebra” and “Algebra” computerized curricula are designed to cover mathematics and problem-solving skills for ethnically diverse, inner-city students in grades 6-12. The curricula are designed to equip students with the skills they need to meet district, state, and national math objectives through an interactive software program that teaches pre-algebra and algebra. The “ I CAN Learn[R] Pre-Algebra” software program consists of 131 lessons, and “Algebra” of 181 lessons. The developer describes the curriculum software as meeting National Council of Teachers of Mathematics standards and configurable to meet state and local grade-level expectations. One study of “ I CAN Learn[R] Pre-Algebra” and “Algebra” met the What Works Clearinghouse (WWC) evidence standards and five more studies met WWC evidence standards with reservations. The six studies, which included more than 16,600 eighth- and ninth-grade students in middle and high schools in California, Florida, Georgia, and Louisiana, compared the standardized math performance of students who used the “ I CAN Learn[R]” system with that of students who used traditional curricula. The “ I CAN Learn[R] Pre-Algebra” and “Algebra” curricula were found to have positive effects on math achievement. (Contains 11 tables and 9 footnotes.) [This publication was produced by the What Works Clearinghouse. The following studies are reviewed in this intervention report: (1) Kirby, P. C. (2006, October). “ I CAN Learn[R] in Orleans Parish Public Schools effects on LEAP 8th grade math achievement, 2003-2004.” (Available from ed-ct, Inc., 2301 Killdeer Street, New Orleans, LA 70122); (2) Kerstyn, C. (2001). “Evaluation of the I CAN Learn[R] mathematics classroom: First year of implementation (2000-2001 school year).” (Available from the Division of Instruction, Hillsborough County Public Schools, 901 East Kennedy Blvd., Tampa, FL 33602); (3) Kerstyn, C. (2002, October). “Evaluation of the I CAN Learn[R] mathematics classroom: Second year of implementation (2001-2002 school year).” (Available from the Division of Instruction, Hillsborough County Public Schools, 901 East Kennedy Blvd., Tampa, FL 33602); (4) Kirby, P. C. (2004, September). “Comparison of I CAN Learn[R] and traditionally-taught 8th grade general math student performance on the California Standards Test, Spring 2004.” (Available from ed-ct, Inc., 2301 Killdeer Street, New Orleans, LA 70122); (5) Kirby, P. C. (2004a, November). “Comparison of I CAN Learn[R] and traditionally-taught 8th grade student performance on the Georgia Criterion-Referenced Competency Test.” Unpublished manuscript; and (6) Kirby, P. C. (2005, January). “ I CAN Learn[R] Algebra I in Catosa County, Georgia.” (Available from ed-ct, Inc., 2301 Killdeer Street, New Orleans, LA 70122).]

Together, the words technology and assess-ment have different meaning for different people. Those who work with educational or instructional technology take these words to mean assessing the impacts of technology on teaching and learning. Test developers and psychometricians, however, consider ways in which computer-based technologies can be used to enhance current approaches to student assessment. This book examines technology and assessment from both perspectives by examining past, current and promising methodol-ogies and applications in both fields. The influences instructional uses of technology and the increasing reliance on testing to gauge student and school performance have on one another are also explored. The book concludes by describing an organizational structure that could bring instructional applications of technology and assessment practices into closer alignment.

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.
