Examples of verbs that relate to this function are: know identify relate list define recall memorize repeat record name recognize acquire or retrieve definitions, facts, or 1. Remembering:

Anderson and Krathwohl Bloom's Taxonomy Revised

Under the original Bloom's Taxonomy, the knowledge/remembering category only included three knowledge dimensions: factual (basic elements of knowledge), conceptual (the interrelationships between basic elements of knowledge), and procedural (the "how-to" part of knowledge). With Anderson and Krathwohl's updates, they added a fourth knowledge dimension: metacognitive (knowledge of cognition and awareness of one's own cognition).

Reflections on Bloom's and Anderson's/Krathwohl's taxonomy. The two taxonomies are extremely useful tools in building awareness of simple to more complex and challenging types of thinking/learning. The Bloom's taxonomy also "provides an excellent structure for planning, designing, assessing and evaluating and learning effectiveness" (Coffey, 2014).

BLOOMS VS ANDERSON/KRATHWOHL TAXONOMY (REVISED) - EDF 5903 ...

Lorin Anderson was once a student of the famed Benjamin Bloom, and David Krathwohl was one of Bloom's partners as he devised his 1956 classic cognitive taxonomy. They called together a group of educational psychologists and educators to help them with the revisions. Their combined efforts led to a revised version of Bloom's famed taxonomy.
