I didn't say the content of their drawings - and this isn't just semantics - it speaks to the culture of the firm.~~

Architectural Graphic Standards | Life of an Architect

Architecture drawing scales. All architecture drawings are drawn to a scale and as described here in great detail, there are set scales that should be used depending on which drawing is being produced, some of which are below: 1:500 (1"=40'0") - Site plan. 1:250 (1"=20'0") - Site plan (note that 1:250 is not a common metric scale)

Symbols on architectural drawings - Designing Buildings Wiki

Many architecture offices have their own standards with regard to the order of sheets in a construction document set and most architects are quite opinionated about whether the Structural drawings belong before or after the Architectural drawings.

Construction Document Sheet Numbers and Order ...

Guide to CAD Layering Standards A layer in cad is a way to differentiate between the different lines that are drawn on a page. The layer can be assigned properties such as linewieght, line type and colour and can be made visible or hidden, amongst other things. You can use layers in a drawing for each different object type or construction element.

Guide to CAD Layering Standards - First In Architecture

Architectural Graphic Standards is the gold-standard reference for practicing architects, engineers, and builders; this Student Edition introduces key elements in a way that's relevant to the budding designer, along with ancillary materials that facilitate internalization.
