The Atlas of Italian Amphibians and Reptiles presents the distribution, ecology and conservation status of the 37 species of amphibians and the 50 species of reptiles found in Italy. A 10x10 km UTM grid map is supplied for each species, on the basis of more than 70.000 records contributed by 900 collaborators during the Societas Herpetologica Italica survey project, started in 1994. Entries, illustrated with photos, are subdivided into the following headings: taxonomy, general distribution, comments on the distribution map, habitat, altitudinal distribution, annual activity cycle, reproduction and status of the Italian populations. General sections on biogeography, history of herpetology in Italy,

This is the story of pasta. Guardian columnist and award-winning food writer Rachel Roddy condenses everything she has learned about Italy's favourite food in a practical, easy-to-use and mouth-watering collection of 100 essential pasta and pasta sauce recipes. Along with the recipes are short essays that weave together the history, culture and the

everyday life of pasta shapes from the tip to the toe of Italy. There is pasta made with water, and pasta with egg; shapes made by hand and those rolled a by machine; the long and the short; the rolled and the stretched; the twisted and the stuffed; the fresh and the dried.

The A-Z of Pasta tells you how to match pasta shapes with sauces, and how to serve them. The recipes range from the familiar - pesto, ragù and carbonara - to the unfamiliar (but thrilling). This is the definitive guide to pasta from one of the best food writers of our time. _____ 'I

Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in

the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original
