In Lawns Into Meadows, landscape designer Owen Wormser makes a case for the power and generosity of meadows. In a world where lawns have wreaked havoc on our natural ecosystems, meadows offer a compelling solution. They establish wildlife and pollinator habitats. They’re low-maintenance and low-cost. They have a built-in resilience that helps them weather climate extremes, and they can draw down and store far more carbon dioxide than any manicured lawn. They’re also beautiful, all year round. Owen describes how to plant an organic meadow that’s right for your site, whether it’s a yard, community garden, or tired city lot. He shares advice on preparing your plot, coming up with the right design, and planting—all without using synthetic chemicals. He passes along tips on building support in neighborhoods where a tidy lawn is the standard. Owen also profiles twenty-one starter grasses and flowers for beginning meadow-makers, and offers guidance on how to grow each one. To illuminate the many joys of meadow-building, Owen draws on his own stories, including how growing up off the grid in northern Maine, with no electricity or plumbing, prepared him for his work. The book, part how-to guide and part memoir, is for environmentalists and climate activists, gardeners and non-gardeners alike. Lawns Into Meadows is part of Stone Pier Press’s Citizen Gardening series, which teaches readers how to grow food and garden in ways that are good for the planet.

The “irresistible” New York Times bestseller that “features heartwarming stories of interspecies love and adorable photographs” (The New York Times Book Review). Written by National Geographic magazine writer Jennifer Holland, Unlikely Friendships documents one heartwarming tale after another of animals who, with nothing else in common, bond in the most unexpected ways. A cat and a bird. A mare and a fawn. An elephant and a sheep. A snake and a hamster. The well-documented stories of Koko the gorilla and All Ball the kitten; and the hippo Owen and the tortoise Mzee. And almost inexplicable stories of predators befriending prey—an Indian leopard slips into a village every night to sleep with a calf. A lioness mothers a baby oryx. Holland narrates the details and arc of each story, and offers insights into why—how the young leopard, probably motherless, sought maternal comfort with the calf, and how a baby oryx inspired the same mothering instinct in the lioness. Or, in the story of Cashew, the lab mix that was losing his eyesight, and Libby, the stray cat who began to guide the dog’s way through the house and yard. With Libby, Cashew lived out his last few years with loving support and a lasting friendship. These are the most amazing friendships between species, collected from around the world and documented in a selection of full-color candid photographs. “The feel-good book of the summer—maybe the year—may very well be Unlikely Friendships.” —USA Today “With aww-inducing photographs, the book highlights the most improbable animal connections.” —National Geographic

This beautiful and definitive guide brings together the world's lead leading expert on North American trout and salmon, Robert Behnke, and the foremost illustrator in the field, Joseph Tomelleri. North America is graced with the greatest diversity of trout and salmon on earth. From tiny brook trout in mountain streams of the Northeast, to cutthroat trout in the rivers of the Rockies, to Chinook salmon of the Pacific, the continent is home to more than 70 types of trout and salmon. How this came to be, how they are related, and what makes them unique -- and so breathtaking -- is the story of Trout and Salmon of North America. The more than 100 illustrations of trout and salmon by Joseph Tomelleri showcased here exhibit a genius for detail, coloration, and proportion. Each portrait is made from field notes, streamside observations, photographs, and specimens collected by the artist. The result is a set of the most accurate and stunning illustrations of fish ever created. Robert Behnke has distilled 50 years of his research and writing about trout and salmon in completing this book. No one understands better than Behnke the diversity and conservation issues concerning these fishes or communicates so lucidly the biological wonders and complexities of their particular beauty. Also included are more than 40 richly detailed maps that clearly show the ranges of populations of trout and salmon throughout North America. An irresistible delight for anyone who appreciates natural history, Trout and Salmon of North America is a master guide to the natural elegance of our native fishes.

The first book of its kind to be published for the Bluegrass State, The Birds of Kentucky is designed to provide an accurate and scientifically rigorous description of all the species of birds found in Kentucky. This comprehensive guide features a wealth of information, including abundance records, migration dates, and additional reference material, and indicates whether a bird is a permanent resident, winter resident, summer resident, visitor, or transient. Additionally, author Burt L. Monroe reviews the history of ornithologists who have worked in Kentucky and outlines the physiography of the state as it relates to birding. More than just a verbal portrait of Kentucky avifauna, The Birds of Kentucky includes fifty-one color paintings by the renowned wildlife artist William Zimmerman, whose work has been favorably compared to that of John James Audubon. In contrast to Audubon's romanticism and often tortuous style, however, Zimmerman offers us "comfortable" birds that look as if they are about to take wing and leave the page. Beautifully illustrated and based on a lifetime of field observation and research, this book provides an excellent guide to the natural history of the birds of the Bluegrass.

Since 1905, Llewellyn's Moon Sign Book has provided detailed times and dates to help gardeners, farmers, and people from all walks of life achieve success. Use this essential life-planning tool to choose the best dates for almost anything: asking for a promotion, fishing, business deals, planting, romance, traveling, breaking a habit, medical treatments, getting married, selling your home, harvesting, starting a new job, and more. The moon's dynamic energy is a gardener's best friend--this guide includes lunar timing tips on planting and harvesting and a guide to companion plants. In addition to new and full moon forecasts for the year, you'll find insightful articles on the moon's role in feng shui, restorative yoga for the full moon, guidance for understanding your natal moon, monthly lore/myths, and more.
•Llewellyn's Moon Sign Book is a perennial bestseller and has been continuously published since 1905
•Includes practical advice on scheduling almost anything related to love and relationships, business and finances, health care, weather, and gardening--this is a complete "when-to" astrological almanac
•Features detailed weather forecasts by Christieen Skinner, and new and full moon forecasts by Sally Cragin
•Includes a week-by-week lunar gardening guide, monthly chart of favorable and unfavorable days for every sign, and timely articles about the moon and how to work with it

Audubon's ambitious project to paint all the birds of North America resulted in a work that represents one of the greatest advances in ornithology. Not only did he identify new species, he also depicted birds within their natural habitat and in vivid poses. This impressive collection ranges from the Greater Flamingo and Bald Eagle to the Carolina parakeet. Audubon describes every species in concise texts, drawing attention the peculiarities of each bird.

Founded in 1971 by Elizabeth Pepper, the art director of Gourmet magazine for many years, The Witches’ Almanac is a witty, literary publication that appeals to general readers as well as hard-core Wiccans. At one level, it is a pop reference that will fascinate anyone interested in folklore, mythology, and culture; but at another, it is the most sophisticated and wide-ranging annual guide available today for the mystic enthusiast. Modeled after the Old Farmers’ Almanac, it includes information related to the annual Moon Calendar (weather forecasts and horoscopes), as well as legends, rituals, herbal secrets, mystic incantations, interviews, and curious tales of good and evil. Although it is an annual publication, much of the content is both timely and timeless—non-specific to the date range of each issue. The theme of Issue 40 (Spring 2021–Spring 2022) is “The Sun—Rays of Hope.” The following articles are also included: “Mithras: Comrade of the Sun, Savior of Soldiers” “Tell the Bees” “Exploring and Embracing the Fluid Gender and Sexuality of Witch-Gods” “Bringing Fairies Back to Your Home” And much more
