AUSTRALASIAN DISPUTE RESOLUTION JOURNAL

Australasian Dispute Resolution is a unique reference to the law and procedure regarding alternative dispute resolution in Australia and New Zealand. Detailed commentary is written by experts on a wide range of practice areas such as banking and finance, insurance, personal injury and workers compensation.

Justice apps – mobile and web-based programmes that can assist individuals with legal tasks – are being produced, improved, and accessed at an unprecedented rate. These technologies have the potential to reshape the justice system, improve access to justice, and demystify legal institutions. Using artificial intelligence techniques, apps can even facilitate the resolution of common legal disputes. However, these opportunities must be assessed in light of the many challenges associated with app use in the justice sector. These include the digital divide and other accessibility issues; the ethical challenges raised by the dehumanisation of legal processes; and various privacy, security, and confidentiality risks. Surveying the landscape of this emergent industry, this book explores the objectives, opportunities, and challenges presented by apps across all areas of the justice sector. Detailed consideration is also given to the use of justice apps in specific legal contexts, including the family law and criminal law sectors. The first book to engage with justice apps, this book will appeal to a wide range of legal scholars, students, practitioners, and policy-makers.

Discusses the skills required by future lawyers, and explores innovative and technology-driven approaches to modernising legal education.

This book outlines key aspects of the use of non-adversarial practices in the Australian justice system with reference to similar developments in the United States, Canada, New Zealand and the United Kingdom. It examines in detail non-adversarial theories and practices such as therapeutic jurisprudence, restorative justice, preventive law, creative problem solving, holistic law, appropriate or alternative dispute resolution, collaborative law, problem-oriented courts, diversion programs, indigenous courts, coroners courts and managerial and administrative procedures.

Mediation Law and Practice gives a thorough account of the practice of mediation from the perspective of the student and practitioner. Divided into two parts, it deals with both the practice of mediation and the law surrounding mediation. Touching on the theory and philosophy behind the practice, it further describes in a theoretical and practical sense the difference between the emerging models of mediation.

Mediator qualities are discussed in terms of issues of gender, culture and power. This book examines the important issue of mediation ethics and, taking into account the developing law surrounding the practice, proposes a code of ethics. It looks at the future of mediation in light of the decline in litigation, the rise in regulatory constraints on mediation and the popularity of online mediation. Mediation Law and Practice provides students and practitioners with the complete text on the practice and law surrounding mediation.

Principles of Dispute Resolution 2nd edition has been revised to provide up-to-date commentary on the development of the law. In particular, the text focuses on the new and amended legislation in both State and federal jurisdictions, along with the developing case law on dispute resolution. Topics covered by this work include -- What is dispute resolution? -- Negotiation -- Mediation -- Arbitration -- Additional dispute resolution processes such as: conciliation; partnering; dispute review advisers and boards; and adjudication, appraisals and determinations -- Jurisdictional hybrids of dispute resolution such as: collaborative law; restorative justice; combined processes; and online dispute resolution -- Statutory dispute resolution schemes -- Legal issues such as: confidentiality; privilege; immunity; enforceability of settlement agreements; and enforceability of dispute resolution clauses in contracts -- Ethics and standards -- The future of dispute resolution.

New and emerging technologies are reshaping justice systems and transforming the role of judges. The impacts vary according to how structural reforms take place and how courts adapt case management processes, online dispute resolution systems and justice apps. Significant shifts are also occurring with the development of more sophisticated forms of Artificial Intelligence that can support judicial work or even replace judges. These developments, together with shifts towards online court processes are explored in Judges, Technology and Artificial Intelligence.

Dispute Management is an introduction to dispute processes. It is a vital resource for students, lawyers and dispute practitioners.

The application of construction dispute procedures has changed dramatically in the last decade. This has resulted in an increased use of Alternative Dispute Resolution in many countries, and mediation in particular. Construction is one of the major industries using mediation, in the UK and in many other countries such as the US, China, Australia and New Zealand. This expansion in mediation has been helped by encouragement from governments, although it takes diverse forms in different legal jurisdictions, for example: court rules to encourage this use (as in the US and UK); the courts' own mediation schemes or programmes, or legislation-backed programmes; or the use of industry driven mediation clauses in standard form contracts. These developments have taken place extremely rapidly. They represent significant changes to the legal environment within which the international construction industry conducts its business but, to date, there has been little research on their impact. All these initiatives have inevitably led to a developing legal jurisprudence concerned with the validity of contract clauses or with providing statutory interpretation of the rules requiring or governing practice. This has important consequences for the construction industry because legal uncertainty increases the likelihood of dispute, which is not only costly for the disputants but can be damaging to national and global economies. This book identifies the emerging international practices within construction mediation, and seeks solutions to the many legal and commercial challenges which they pose. It presents an international collection of reviews by experts, and allows a comparative commentary on the practice of construction mediation and the legal challenges facing its development.

This book provides a state-of-the-art overview and assessment of the status quo and future of the Online Dispute Resolution (ODR) field. International, comparative, and interdisciplinary approaches have been utilized. Written by leading ODR scholars, the first part of the book includes an in-depth assessment of ODR, its applications, and its future in a comparative and analytical context. The second section offers a regional oriented approach, where the prospects, challenges, and success of ODR - and its applications in the North America, Latin America, Africa, Australia, Europe, and Asia - are mapped and fully addressed. The book is a must read text by scholars, practitioners, academics, and researchers in the dispute resolution and information technology field.
