inside living cells.

~~Study Guide  
Viruses - CliffsNotes  
Answer Key  
Study Guides~~

Virus Notes. Viruses are tiny particles much smaller than bacteria and can only be seen with a very powerful microscope. In isolation, viruses show none of the expected signs of life. They do not respond

# Download Ebook Bacteria

to stimuli, they do not grow; they do not do any of the things we normally associate with life.

## ~~Bacteria Protist & Virus Notes~~

Viruses are not living organisms, bacteria are. Viruses only grow and reproduce inside of the host cells they infect.

# Download Ebook Bacteria

When found outside of these living cells, viruses are dormant. Their “ life ”

therefore requires the hijacking of the biochemical activities of a living cell.

Bacteria, on the other hand, are living organisms that consist of single cell that can generate energy, make its own
