Basic Computer Engineering - BCE Study Materials | PDF ...

Computer engineering is the design, analysis, and application of computer systems, balancing hardware and software and the basic modeling techniques used to represent the computing process. Computer engineers design computer systems, from telecommunications to consumer products and manufacturing, and also work in service fields like financial and information systems and network administration.

Computer Engineering Program

The basic parts of a computer are as follows ? Input Unit ? Devices like keyboard and mouse that are used to input data and instructions to the computer are called input unit. Output Unit ? Devices like printer and visual display unit that are used to provide information to the user in desired format are called output unit.
