### Drawings Standards and Conventions

Ink Drawing - The line group is designated according to the thickness of the thickest line. For any particular drawing, a line-group is selected according to its size and type. All lines should be sharp and dense so that good prints can be reproduced. Pencil Drawing - For drawing finalized with pencil, the lines can be divided into two line- groups. It is important to note that in the finished drawing, all lines except construction line should be dense, clean and uniform.

### Mechanical Drawing Conventions | ClipArt ETC

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component.
