DIVA graphic, highly user-friendly guide to national codes for residential construction. Codes for Homeowners uses clear photographs to show exactly how the parts of your house are supposed to look once the work is done. Written by International Residential Codes-certified home inspector Bruce Barker, this second edition of Codes for Homeowners is current with most national codes in force for the period of 2012 through 2014. Based on his decades of experience, Inspector Bruce has winnowed down the massive heap of codes in force to only those that a single-family homeowner is likely to encounter. Building codes, electrical codes, plumbing codes and mechanical (HVAC) codes are shown and described in everyday language. The 2nd edition includes all of the great information in the first version but is updated to reflect any changes in the codes in force, including the National Electrical Code, the Universal Plumbing Code and the International Residential Code.*div*

Make sure your deck is safe for family and friends with BLACK+DECKER Deck Codes and Standards Bruce Barker, one of the country's leading authorities on building codes, has turned his eye toward one of his favorite subjects: building decks. Although it's one of the most popular DIY building projects, just about every deck built in the past decade (by pros as well as homeowners) falls short of current codes. In BLACK+DECKER Deck Codes & Standards Barker zeroes in on the main areas of concern and shows accurately and precisely how to design and build it right. Given that every year in the U.S. more than 120,000 people are injured by deck collapses, and more than 50 die, following Barker's careful and detailed advice is the surest way for a homeowner to protect against disaster. Using the same common-sense approach he used in his bestselling book BLACK+DECKER Codes for Homeowners, Barker isolates the aspects of deck building that are the most frequent sources of trouble and shows—with photos, illustrations, and commentary—exactly how to do it correctly. Barker's new book is not only for DIYers who are building a brand new deck. National deck building codes have changed significantly in the past five years: 4 x 4 posts are no longer allowed for structural purposes that a few years ago were deemed fine and minimum diameter requirements for concrete posts have doubled in many applications, for instance. If your existing deck is more than two or three years old, you'll want this detailed but accessible volume, too.

You don't need to be an expert to assess your house's codes - you just need this guide. What is the proper clearance for an egress window? Does flexible duct have to be supported every four feet or five? Can vent pipe terminations be located near operable doors and windows? The difference between a code-compliant fixture and an egregious violation is often smaller than you think. You may have friends, family, or neighbors who claim to know, but how can you be sure? Is it worth taking their advice against future violations, fees, and fixes? The completely updated Codes for Homeowners is here to help. Written by International Residential Codes/certified home inspector Bruce Barker, this third edition of Codes for Homeowners is current with most national codes in force for the period of 2015 through 2017.
