The fifth-generation 4A-GE engine produced from 1995 to 2000 is the final version of the 4A-GE engine and has black cam covers. It uses Toyota Variable Valve Timing (VVT) system on the intake cam. This engine is commonly known as the "black top" due to the color of the valve cover, and yet again features an even higher compression ratio (11:1).

Blacktop The name 'Blacktop' is given to the 5h generation of the 4A-GE engines. It's not an official name that Toyota gave to the engine, but something Toyota enthusiasts came up with to distinguish this generation of the 4A-GE. The reason for the name is pretty obvious: The valve covers and protectionplate between them are all black.
