Blockchain technology accounts for the issues of security and trust in several ways. First, new blocks are always stored linearly and chronologically. That is, they are always added to the “ end ” of...

~~Blockchain: Everything You Need to Know~~

Bitcoin blockchain structure A blockchain, originally block chain, is a growing list of records, called blocks, that are linked using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a Merkle tree). By design, a blockchain is resistant to modification of its data. This is because once recorded, the data in ...

Blockchain Explained 1 - The Glass Box Analogy Fabricio Santos of Cointelegraph explained blockchain in a Medium article using the analogy of a glass box. He described a bank vault, in which there are rows of unlabeled boxes. Each box has a glass facade which allows everyone in the bank to see the contents of the box.
