Laugh-out-loud hilarious, genuine, and a proper *Geordie*, Charlotte's popularity has even seen her crowned winner of 2013's *Celebrity Big Brother*. With her trademark humour and warmth, in *ME ME ME Charlotte* takes us on a very unique journey through her eventful teenage years (where literally nothing is off limits!), her attempts at holding down jobs (and booze), the life-changing experience of *Geordie Shore*, the truth about Gaz and his parsnip, and her inspiring weight-loss triumph. Teaching fundamental design concepts and the challenges of emerging technology, this textbook prepares students for a career designing the computer systems of the future. In-depth coverage of complexity, power, reliability and performance, coupled with treatment of parallelism at all levels, including ILP and TLP, provides the state-of-the-art training that students need. The whole gamut of parallel architecture design options is explained, from core microarchitecture to chip multiprocessors to large-scale multiprocessor systems. All the chapters are self-contained, yet concise enough that the material can be taught in a single semester, making it perfect for use in senior undergraduate and graduate computer architecture courses. The book is also teeming with practical examples to aid the learning process, showing concrete applications of definitions. With simple models and codes used throughout, all material is made open to a broad range of computer engineering/science students with only a basic knowledge of hardware and software.
