My take from this book is that what we now think of as British identity was essentially knitted together during the period this book covers, from the Union with Scotland in 1707 to the accession of Queen Victoria in 1837, but most particularly in the years following the loss of the American colonies in 1776.

"Controversial, entertaining and alarmingly topical ... a delight to read."Philip Ziegler, Daily Telegraph

A major contribution to an understanding of Britain's past and to the shape and survival of Britain and its institutions in the future.

In this path-breaking book Linda Colley reappraises the rise of the biggest empire in global history. Excavating the lives of some of the multitudes of Britons held captive in the lands their own rulers sought to conquer, Colley also offers an intimate understanding of the peoples and cultures of the Mediterranean, North America, India, and Afghanistan. Here are harrowing, sometimes poignant stories by soldiers and sailors and their womenfolk, by traders and con men and by white as well as black slaves. By exploring these forgotten captives – and their captors – Colley reveals how Britain's emerging empire was often tentative and subject to profound insecurities and limitations. She evokes how British empire was experienced by the mass of poor whites who created it. She shows how imperial racism coexisted with cross-cultural collaborations, and how the gulf between Protestantism and Islam, which some have viewed as central to this empire, was often smaller than expected. Brilliantly written and richly illustrated, Captives is an invitation to think again about a piece of history too often viewed in the same old way. It is also a powerful contribution to current debates about the meanings, persistence, and drawbacks of empire.

These continue to nourish the verse of sophisticated post-British 'barbarian' poets such as Seamus Heaney, Tony Harrison, Douglas Dunn, Les Murray and Derek Walcott. More than that, they are bound up with the contemporary literature and politics of Britain after devolution."--BOOK JACKET.

Vivid and magisterial, *The Gun, the Ship, and the Pen* reconfigures the rise of a modern world through the advent and spread of written constitutions. A work of extraordinary range and striking originality, *The Gun, the Ship, and the Pen* traces the global history of written constitutions from the 1750s to the twentieth century, modifying accepted narratives and uncovering the close connections between the making of constitutions and the making of war. In the process, Linda Colley both reappraises famous constitutions and recovers those that have been marginalized but were central to the rise of a modern world. She brings to the fore neglected sites, such as Corsica, with its pioneering constitution of 1755, and tiny Pitcairn Island in the Pacific, the first place on the globe permanently to enfranchise women. She highlights the role of unexpected players, such as Catherine the Great of Russia, who was experimenting with constitutional techniques with her enlightened Nakaz decades before the Founding Fathers framed the American constitution. Written constitutions are usually examined in relation to individual states, but Colley focuses on how they crossed boundaries, spreading into six continents by 1918 and aiding the rise of empires as well as nations. She also illumines their place not simply in law and politics but also in wider cultural histories, and their intimate connections with print, literary creativity, and the rise of the novel. Colley shows how—while advancing epic revolutions and enfranchising white males—constitutions frequently served over the long nineteenth century to marginalize indigenous people, exclude women and people of color, and expropriate land. Simultaneously, though, she investigates how these devices were adapted by peoples and activists outside the West seeking to resist European and American power. She describes how Tunisia generated the first modern Islamic constitution in 1861, quickly suppressed, but an influence still on the Arab Spring; how Africanus Horton of Sierra Leone—inspired by the American Civil War—devised plans for self-governing nations in West Africa; and how Japan's Meiji constitution of 1889 came to compete with Western constitutionalism as a model for Indian, Chinese, and Ottoman nationalists and reformers. Vividly written and handsomely illustrated, *The Gun, the Ship, and the Pen* is an absorbing work that—with its pageant of formative wars, powerful leaders, visionary lawmakers and committed rebels—retells the story of constitutional government and the evolution of ideas of what it means to be modern.

The United Kingdom; Great Britain; the British Isles; the Home Nations: such a wealth of different names implies uncertainty and contention - and an ability to invent and adjust. In a year that sees a Scottish referendum on independence, Linda Colley analyses some of the forces that have unified Britain in the past. She examines the mythology of Britishness, and how far - and why - it has faded. She discusses the Acts of Union with Wales, Scotland and Ireland, and their limitations, while scrutinizing England's own fractures. And she demonstrates how the UK has been shaped by movement: of British people to other countries and continents, and of people, ideas and influences arriving from elsewhere. As acts of union and disunion again become increasingly relevant to our daily lives and politics, Colley considers how - if at all - the pieces might be put together anew, and what this might mean. Based on a 15-part BBC Radio 4 series.

In this remarkable reconstruction of an eighteenth-century woman's extraordinary and turbulent life, historian Linda Colley not only tells the story of Elizabeth Marsh, one of the most distinctive travelers of her time, but also opens a window onto a radically transforming world.Marsh was conceived in Jamaica, lived in London, Gibraltar, and Menorca, visited the Cape of Africa and Rio de Janeiro, explored eastern and southern India, and was held captive at the court of the sultan of Morocco. She was involved in land speculation in Florida and in international smuggling, and was caught up in three different slave systems. She was also a part of far larger histories. Marsh's lifetime saw new connections being forged across nations, continents, and oceans by war, empire, trade, navies, slavery, and print, and these developments shaped and distorted her own progress and the lives of those close to her. Colley brilliantly weaves together the personal and the epic in this compelling story of a woman in world history.

Offers an account of Great Britain's imperial path from the Stuart Restoration of 1660 to its emergence as a dominant global superpower. This book includes over 30 illustrations and maps to help orient the reader.

In this imaginative book, Maya Jasanoff uncovers the extraordinary stories of collectors who lived on the frontiers of the British Empire in India and Egypt, tracing their exploits to tell an intimate history of imperialism. Jasanoff delves beneath the grand narratives of power, exploitation, and resistance to look at the British Empire through the eyes of the people caught up in it. Written and researched on four continents, *Edge of Empire* enters a world where people lived, loved, mingled, and identified with one another in ways richer and more complex than previous accounts have led us to believe were possible. And as this book demonstrates, traces of that world remain tangible—and topical—today. An innovative, persuasive, and provocative work of history.
