Spirituality at the School Gate is an innovative and explorative new study grounded in the field of lived religion. It examines how intentionally engaging in spirituality makes a difference to relationships made at the school gate, and looks at the importance of compassion and encounter. Unlike the everyday location of the workplace or the home, the school gate, which is primarily populated by women, is an overlooked, under-researched locus of spirituality. This book reveals it as a context deserving of attention, and sheds a concentrated beam of light on what proves to be a site of rich, embodied spiritual practice. It will encourage readers to approach their daily school-gate experiences with more intentionality and appreciation of the presence of God in the everyday.

At the very heart of modern healthcare is a critical paradox. Today, as never before, healthcare has the ability to enhance the quality and duration of life. At the same time, healthcare has become so enormously costly that it can easily bankrupt governments and impoverish individuals and families. According to federal forecasters, by the year 2015 one in every five U.S. dollars will be spent on healthcare, for total annual healthcare spending of more than \$4 trillion. While the cost of healthcare is going up, the number of individuals and families without health insurance coverage is increasing. For many, the miracles of modern medicine may be unaffordable. Health services research investigates the relationship between the factors of cost, quality, and access to healthcare and their impact upon medical outcomes (i.e., death, disease, disability, discomfort, and dissatisfaction with care). Health services research addresses such key questions as, Why is the cost of healthcare always increasing? How can healthcare costs be successfully contained without jeopardizing quality? How can medical errors be eliminated? What is the medical impact of not having health insurance coverage? The proposed encyclopedia addresses these and other important questions and issues.
