"This book provides a comprehensive collection of research and analysis on the principles of service, knowledge and organizational capabilities, clarifying IT strategy procedures and management practices and how they are used to shape a firm's knowledge resources"--Provided by publisher.

The arrival of Information and Communication Technology may play a role in restoring competitiveness, since these technologies are also a factor in relaxing the constraints specific to SMEs. ICT makes a number of services possible in a large range of processes and transactions within and between companies. Internally, ICT applications can improve knowledge and information management practices; they can also allow more rapid and more reliable transactions between businesses (B2B) and between businesses and consumers (B2C). They are equally quite effective in improving external business communications and service quality for both new and existing clients. They also appear to be a source of competitive advantage for SMEs under certain conditions. Few studies have focused on the ways that SMEs can use ICT to improve and defend their competitive positions. This book provides a synthesis of the advantages of ICT for SMEs. Seven chapters illustrate the technologies used in such companies. Each of these chapters provides a theoretical and/or practical view of the way that SMEs can use ICT. This book is an indispensable reference for both academics and for practitioners.

As the field of information technology continues to grow and expand, it impacts more and more organizations worldwide. The leaders within these organizations are challenged on a continuous basis to develop and implement programs that successfully apply information technology applications. This is a collection of unique perspectives on the issues surrounding IT in organizations and the ways in which these issues are addressed. This valuable book is a compilation of the latest research in the area of IT utilization and management.

This book constitutes the refereed proceedings of the 14th International Workshop on Enterprise and Organizational Modeling and Simulation, EOMAS 2018, held in Tallinn, Estonia, in June 2018. The main focus of EOMAS is on the role, importance, and application of modeling and simulation within the extended organizational and enterprise context. The 11 full papers presented in this volume were carefully reviewed and selected from 22 submissions. They were organized in topical sections on conceptual modeling, enterprise engineering, and formal methods.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who

contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Surgeon are presented an in-depth view of current surgical management of the cleft lip and palate patient in this issue of *Clinics in Plastic Surgery*. Focusing on aspects most relevant to plastic surgeons, each article offers an evidence-based assessment of current management options along with detailed descriptions of the author ' s preferred surgical technique. Outcomes measures for each aspect of cleft care are discussed, along with an update on current inter-center outcomes studies in the US and abroad. This issue of *The Clinic ' s* brings the current state of the art in cleft treatment to the practicing plastic surgeon, highlighting the changes and ongoing developments in the field. Topics include the nuanced management of Pierre Robin Sequence and Velo-cardio-facial syndrome, the continued evolution of naso-alveolar molding, and new developments in orthognathic surgery.

This issue of *Clinics in Chest Medicine* focuses on Pulmonary Complications of Non-Pulmonary Malignancy. Editors Guang-Shing Cheng and Jennifer Possick have assembled an expert team of authors on topics such as: Pulmonary manifestations of non-pulmonary solid malignancies; Pulmonary manifestations of leukemia and lymphoma; Radiation pneumonitis; Toxicities from conventional chemotherapy; Toxicities from novel targeted therapies; Bacterial pneumonia; Fungal pneumonia; Viral pneumonia; IPS and other early onset non-infectious pulmonary syndromes; Pulmonary GVHD and other late-onset non-infectious pulmonary syndromes; Pulmonary function and pre-transplant risk assessment; Diagnostic Evaluation of Pulmonary Abnormalities in Hematologic Malignancy and HCT; Acute respiratory failure in patients with non-pulmonary malignancy; Critical care prognosis and outcomes in patients with non-pulmonary malignancy; and Palliative and end-of-life care.
