more transparent. Additionally, over 1,000 new classic calculus problems were added to the exercise sets.

Vincent Spinetti is an archetypal tortured artist, a sensitive young writer who falls victim to alienation, parental neglect, poverty, depression, alcoholism, illness, nervous breakdowns, and unrequited love. He is painfully unaware that these torments are due to the secret manipulations of New Renaissance, an experimental organization that is testing the age-old idea that art results from suffering.

Designed for the three-semester engineering calculus course, **CALCULUS: EARLY TRANSCENDENTAL FUNCTIONS**, Sixth Edition, continues to offer instructors and students innovative teaching and learning resources. The Larson team always has two main objectives for text revisions: to develop precise, readable materials for students that clearly define and demonstrate concepts and rules of calculus; and to design comprehensive teaching resources for instructors that employ proven pedagogical techniques and save time. The Larson/Edwards Calculus program offers a solution to address the needs of any calculus course and any level of calculus student. Every edition from the first to the sixth of **CALCULUS: EARLY TRANSCENDENTAL FUNCTIONS** has made the mastery of traditional calculus skills a priority, while

problems were added to the exercise sets.

The student solutions manual provides students with complete solutions to all odd end of section and end of chapter problems.

Students who have used Smith/Minton's Calculus say it was easier to read than any other math book they've used. That testimony underscores the success of the authors' approach, which combines the best elements of reform with the most reliable aspects of mainstream calculus teaching, resulting in a motivating, challenging book. Smith/Minton also provide exceptional, reality-based applications that appeal to students' interests and demonstrate the

elegance of math in the world around us. New features include:

- A new organization placing all transcendental functions early in the book and consolidating the introduction to L'Hôpital's Rule in a single section.
- More concisely written explanations in every chapter.
- Many new exercises (for a total of 7,000 throughout the book) that require additional rigor not found in the 2nd Edition.
- New exploratory exercises in every section that challenge students to synthesize key concepts to solve intriguing projects.
- New commentaries (" Beyond Formulas ") that encourage students to think mathematically beyond the procedures they learn.
- New counterpoints to the historical notes, " Today in Mathematics, " that stress the contemporary dynamism of mathematical research and applications, connecting past contributions to the present.
- An enhanced discussion of differential equations and additional

applications of vector calculus.

Appropriate for the third semester in the college calculus sequence, the Fourth Edition of Multivariable Calculus maintains the student-friendly writing style and robust exercises and problem sets that Dennis Zill is famous for. Ideal as a follow-up companion to Zill's first volume, or as a stand-alone text, this exceptional revision presents the topics typically covered in the traditional third course, including Vector-Valued Functions, Differential Calculus of Functions of Several Variables, Integral Calculus of Functions of Several Variables, Vector Integral Calculus, and an Introduction to Differential Equations.
