Your mind is most powerful tool you can imagine; it can be your best friend, or your worst enemy. You are the only person responsible for what is happening to you, and if you see it any other way it is because of your mind and the way it is trained. Imagine that you are a carriage and your thoughts are horses, and if those horses are out of control, guess what will happen? Every horse (your thoughts) will keep pulling in their own direction without any regard to what will happen to the carriage, which is you. However, if you learn how to tame your horses/thoughts you will be in control of them. This is the truth, whether you believe it or not.

Each year, 700,000 students from around the world come to the United States and Canada to study. For many, the experience is as challenging as it is exciting. Far from home, they must adapt to a new culture, new university system, and in many cases, a new language. The process can be overwhelming, but as Charles Lipson's *Succeeding as an International Student in the United States and Canada* assures us, it doesn't have to be. *Succeeding* is designed to help students navigate the myriad issues they will encounter—from picking a program to landing a campus job. Based on Lipson's work with international students as well as extensive interviews with faculty and advisers, *Succeeding* includes practical suggestions for learning English, participating in class, and meeting with instructors. In addition it explains the rules of academic honesty as they are understood in U.S. and Canadian universities. Life beyond the classroom is also covered, with handy sections on living on or off campus, obtaining a driver's license, setting up a bank account, and more. The comprehensive glossary addresses both academic terms and phrases heard while shopping or visiting a doctor. There is even a chapter on the academic calendar and holidays in the United States and Canada. Coming to a new country to study should be an exciting venture, not a baffling ordeal. Now, with this trustworthy resource, international students have all the practical information they need to succeed, in and out of the classroom.

The first-ever health-focused cookbook from everyone's favorite celebrity chef, Michael Symon. Fix It with Food shares how Symon learned which foods caused his inflammation and pain (he calls these his food triggers) and helps readers discover their own food triggers. By beginning with a "reset," readers will identify which foods to avoid, and then, with 125 creative and health-supportive recipes, they'll learn that just like Michael Symon, you don't need to sacrifice delicious food to eat healthfully and be pain-free. When Michael Symon found out he had rheumatoid arthritis and external lupus, he suspected that what he ate--or didn't eat--could make a profound difference in how he felt. So he committed to a food reset on The Chew--no red meat, white flour, sugar, dairy, or alcohol. He recorded his results using social media to share his experience with his hundreds of thousands of fans--and what happened next was incredible--after a few days, he felt amazing. Michael discovered that dairy, sugar, and processed flours are his triggers, and that by avoiding them, his inflammation essentially vanished. Viewers connected with his journey and asked him to share his recipes. From Ginger and Chile-Roast Chicken to a dairy-free Mac and Cheese, Spaghetti Squash with Arugula Pesto to an Apple and Cherry Oat Crisp, Michael came up with more than 125 incredible recipes to satisfy his cravings without aggravating his body. The recipes in Fix It with Food provide guidance to both identifying food triggers and creating a meal plan that works around whatever ingredient causes your discomfort.
