Keep your Mac safe from intruders, malware, and more! Version 1.3, updated November 23, 2021 Secure your Mac against attacks from the internet and physical intrusion with the greatest of ease. Glenn Fleishman guides you through configuring your Mac to protect against phishing, malware, network intrusion, social engineering, and invaders who might tap physically into your computer. Glenn teaches how to secure your data at rest and in motion. Learn about built-in privacy settings, the Secure Enclave, FileVault, sandboxing, VPNs, recovering a missing Mac, and much more. Covers Catalina, Big Sur, and Monterey. The digital world has never seemed more riddled with danger, even as Apple has done a fairly remarkable job across decades at keeping our Macs safe. But the best foot forward with security is staying abreast of past risks and anticipating future ones. Take Control of Securing Your Mac gives you all the insight and directions you need to ensure your Mac is safe from external intrusion and thieves or other ne'er-do-wells with physical access. Security and privacy are tightly related, and Take Control of Securing Your Mac helps you understand how macOS has increasingly compartmentalized and protected your personal data, and how to allow only the apps you want to access specific folders, your contacts, and other information. Here's what this book has to offer: • Master a Mac's privacy settings • Calculate your level of risk and your tolerance for it • Learn why you're asked to give permission for apps to access folders and personal data • Moderate access to your audio, video, and other hardware inputs and outputs • Get to know the increasing layers of system security through Catalina, Big Sur, and Monterey • Prepare against a failure or error that might lock you out of your Mac • Share files and folders securely over a network and through cloud services • Set a firmware password and control other low-level security options to reduce the risk of someone gaining physical access to your Mac • Understand FileVault encryption and protection, and avoid getting locked out • Investigate the security of a virtual private network (VPN) to see whether you should use one • Learn how the Secure Enclave in Macs with a T2 chip or M-series Apple silicon affords hardware-level protections • Dig into ransomware, the biggest potential threat to Mac users, but still a largely theoretical one • Decide whether anti-malware software is right for you
--

The luxurious celebrity cruise launching the trendy new diet sweetener Solu should be the vacation of a lifetime. But Laurel is starting to regret accepting her friend Viv's invitation. She's already completely embarrassed herself in front of celebrity host Tom Forelli—the hottest guy ever!—and she's too sick to even try the sweetener. And that's before Viv and all the other passengers start acting really strange. Tom knows that he should be grateful for this job and the chance to shed his former-child-star image. His publicists have even set up a 'romance' with a sexy reality star. But as things on the ship start to get wild, he finds himself drawn to a different girl. And when the hosting gig turns into an expose on the shocking side effects of Solu, it's Laurel that he's determined to save. Emmy Laybourne, author of the Monument 14 trilogy, takes readers on a dream vacation in Sweet that goes first comically, then tragically, then horrifyingly, wrong!

YOU CANT MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH!" * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

Make a smooth transition to Apple silicon Version 1.2.1, updated November 12, 2021 This book teaches you everything you need to know about hardware and related software changes in Apple's new M1-series Apple silicon Macs to make a transition from an Intel Mac, set up security with new options, create effective backups, and work with new options in recovery mode. Glenn Fleishman takes you through the details of how an M-series Mac handles startup, battery management, and running iOS, iPadOS, and Windows apps. Covers the 2020–21 Apple M1-series Macs: the Mac mini, MacBook Air, 13-inch MacBook Pro, 24-inch iMac, and 14-inch and 16-inch MacBook Pro models (featuring the M1 Pro or M1 Max chip). Apple's new Macs based on the M1-series Apple silicon system-on-a-chips offer remarkable advances in performance, battery life, and memory utilization. With those improvements comes a host of changes in hardware, from how a Mac starts up to making backups of your computer to understanding fundamental aspects of system security. Take Control of Your M-Series Mac teaches you everything you need to know about these topics and much more. You'll learn not just how to make a bootable clone of your Mac on an external drive, but whether it's necessary with Monterey or Big Sur and an M1-series Mac. Find out how to make a clean transition from an Intel Mac, while taking advantage of installing and running iOS and iPadOS apps natively within macOS. You'll also learn the early method of running Windows on an M1 Mac, with notions of what's to come. If you've already bought an M1-series Mac and want to get more out of it, or you're considering a purchase and trying to understand what you need to know, Take Control of Your M-Series Mac will fit your needs. NOTE: This book is intended for people who are already familiar with Macs. It is not a beginner's guide, nor is it a complete user manual. Its focus is on what's different about M-series Macs compared to Intel-based Macs. Future plans: This book will be updated as Apple releases updated features for existing M1 Macs and new Macs based on its M-series processors. Here's what you will learn from this book: • Get to know the M1, M1 Pro, and M1 Max processors, and what's so different about them • Understand the limits of emulation • Control how apps for Intel Macs and universal Intel/M-series apps launch on an M-series Mac • Learn the complexities of backing up an M-series Mac • Decide whether you need a bootable duplicate of your startup volume • Maximize battery life and longevity • Work with recoveryOS, a substantially different process with an M-series Mac • Walk through a new process of reviving or restoring low-level firmware on a non-responsive Mac • Manage system security when you need to work with kernel extensions • Install and run iOS and iPadOS apps • Learn the current limits of using Windows in macOS on an M1-series system

Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

Radio Frequency Energy: Background; Electromagnetic sources; Simple antennas; More complex antennas; Antennas using conducting surfaces; Specialised antennas; Summary. Moving Quanta from Place to Place: Introduction to Various Propagation Environments; Describing the Earth's Atmosphere; The Troposphere; Reflection; Where We Live; Near Earth Propagation; Radio Propagation in a Complex Urban Environment; Sky-wave Propagation; Artificial Sky-wave Propagation; Summary; Index; Appendix: Feeders.

Living with a tigress is no joke! This is the true story of a Forest Conservator who risked his life and went beyond the call of duty for Khairi, a tigress he considered as his very own. The book offers the perfect balance of a biography and a scientific study. Khairi is so brilliantly brought to life in this book that you almost expect to hear her padding up behind your chair, purring loudly.
--

For centuries, supernatural powers have reigned, warring among themselves, culling the human herds and lashing out from the shadows. The creatures of the night have held court since before the dawn of history. Nothing lasts forever. From the throng of humanity, individuals emerge who know the truth. They know monsters exist. Enough is enough! The forces of darkness must pay their due. The time of retribution is at hand. Hunter: The Reckoning is the sixth Storyteller game released for the modern World of Darkness. This lavishly illustrated hardcover book presents all the rules and background information needed to finally bring mankind's fight to the supernatural. This game is not a Hunter's Hunted second edition. These are all-new character types with their own agendas for the world... and the monsters that inhabit it.

Jarvis Langton is an unborn-again Christian living on the fringe. He's not big on life and has tried to finish his own twice. Still, most mornings, he quite likes to sun himself at Sydney's Royal Botanic Gardens. One morning he notices something winking at him from a nearby bush. When he investigates he finds the dead body of his friend, Lady; a Thai transvestite. Jarvis is not someone with his thoughts lined up in any reasonable order. It takes him a while to work out Lady must have been murdered. It takes him longer to decide he's going to find her killer - but once he does, the premonition that finding Lady's murderer will bring him his own end, happens in an instant. "Parable of the Forgotten is a first class, no rest-stop, brilliant, whirly gig!" Dr She Mackenzie Hawke, University Of Sydney.
