This linear equation is written in slope-intercept form. The slope-intercept form of a linear equation is $y = mx + b$, where m is the slope of the line and $(0, b)$ is the y -intercept.

You can use this form to write linear equations when you know the slope and the y -intercept. **WORKED**

EXAMPLE Just as you

whenever a linear equation written in slope-intercept form shows a plus sign, it is a translation right or up, and when it shows a minus sign it is a translation left or down, because positive always means up and right on the coordinate grid, and negative always means left and down.
