The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of

paper which builds on the knowledge and skills acquired at earlier levels in the preparation and analysis of financial reports for single entities and groups. It takes these areas to a higher level, putting into context the role of the accountant as a professional steward and adviser, who is

responsible to the stakeholders of an organisation. It has five main sections:

1. Regulatory and ethical framework and current issues
2. Reporting the financial performance of entities
3. Group financial statements
4. Specialised entities
5. Analysis of the financial performance

of entities. The main new topics introduced at this level relate to group accounts, but other topics are tested with a different emphasis and in more depth than at the Fundamentals Level. We provide material for both International and UK streams. The study text has been
