The second edition of this popular industrial guide describes over 2,800 currently available epoxy resins, curing agents, compounds, and modifiers, based on information supplied by 71 manufacturers or distributors of these products. Epoxy resins have experienced tremendous growth since their introduction in the 1950s. Future growth will be in new markets in the specialty performance areas and high-technology applications. Each raw material or product is described, as available, with typical assay or checkpoint figures and a brief summary of important features or applications. Additional sections useful to the reader are the Suppliers' Addresses and a Trade Name Index.

Regarding Cocktails is the only book from the late Sasha Petraske, the legendary bartender who changed cocktail culture with his speakeasy-style bar Milk & Honey. Here are 85 cocktail recipes from his repertoire—the beloved classics and modern variations—with stories from the bartenders he personally trained. Ingredients, measurements, and preparations are beautifully illustrated so that readers can make professional cocktails at home. Sasha's advice for keeping the home bar, as well as his musings, are collected here to inspire a new generation of bartenders and cocktail enthusiasts.

The catalogue is abundantly illustrated, including multiple views of each sculpture."--BOOK JACKET.

Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Local Disaster Management explores what resilience means for local communities and local governments on the front line of responding to disasters and emergencies. Disaster management is often seen as a major international issue undertaken by global actors such as the UN, Red Cross and Red Crescent. Yet fundamentally, all disasters are local. Every disaster, regardless of its type, affects individuals, families and communities before they escalate to encompassing one or many communities or nations. This volume therefore explores fundamental issues of disaster and emergency management at the local level. What is resilience? What does resilience mean for a local government seeking to lessen the impact of disasters on their community? How do local governments adapt through their experiences of disasters and how do they recover from catastrophic experiences? This book explores these issues with chapters from top scholars in the field, draws out lessons for local government officials and disaster managers seeking to build community resilience, prepare their communities for a changing environment, and facilitate recovery after disasters strike. Local Disaster Management provides invaluable insight for local governments charged with managing the inescapable effects of climate change and the increasing frequency and severity of disasters, as well as for scholars of local governance, disaster resilience, government policy, and disaster management. The chapters were originally published as a special issue in Local Government Studies.

De Wallen: Amsterdam's Red Light District A limited edition hand-printed artists' book by social documentary photographer Daniel D. Teoli Jr.De Wallen: Amsterdam's Red Light District is 8 1/2 inch square format, spiral bound and hand printed with Epson inkjet printers using archival pigment ink sets on acid free DUO paper.
