Catastrophic Non -Survivable Brain Injury (CPG ID: 13)

Catastrophic Brain Injury Guidelines I. PURPOSE: To provide standard, critical care to patients with catastrophic brain injuries in order to optimize the perfusion and function of all organ systems, such that the possibility for survival as well as the option for organ donation can be simultaneously preserved. II.

Revised 9-28-16 OHSU Trauma ICU Catastrophic Brain Injury ...

Catastrophic Brain Injury Guidelines Consider obtaining a critical care consult if not already involved in patient care. See patients' attending physician for orders. Maintain SBP > 100 (MAP > 60) 1. Consider invasive hemodynamic monitoring 2. Adequate hydration: Ensure adequate hydration to maintain euvolemia 3.

Catastrophic Brain Injury Guidelines - Organ Donation and ...

Catastrophic Brain Injury Guidelines. These guidelines are to preserve organ function in the neurologically-devastated patient. Organ donation should not be mentioned to the patient's family. LifeNet Health will consult with the healthcare team before discussing donation options with the family. Maintain SBP>100 (MAP>60)

CBIGs | LifeNet Health

An organ procurement organization (OPO) and a level I trauma center developed catastrophic brain injury guidelines (CBIGs) to assist in the care of severely brain-injured adult patients before brain death. The CBIGs provided a set of clinical guidelines to maintain patient stability and optimize opportunity for organ donation.

Impact of Catastrophic Brain Injury Guidelines on Donor ...

A patient who sustains catastrophic or devastating brain injuries requires intensive monitoring and treatment, typically in an intensive care setting. Recommended treatment guidelines include: Maintain systolic blood pressure (SBP) greater than 100 mmHg or mean arterial pressure greater than 60 mmHg. Treat Diabetes Insipidus to prevent intravascular fluid depletion.
