My mate told me that I just don't understand irony. Which was ironic because we were at a bus stop at the time. A dyslexic man walks into a bar. An onion just told me a joke. I don't know whether to laugh or cry. A priest, a rabbi and a blind man walk into a bar and the bartender says, 'What is this, some kind of joke?' I got chatting to a lumberjack in a pub. He seemed like a decent feller. I'll never forget what my granddad said to me just before he kicked the bucket. He said, 'Grandson, how far do you think I can kick this bucket?' Whether told in the rugby clubs of Wales or the gentlemen's clubs of London, their sharpness and simplicity unites us all. Short, sweet and wickedly clever, they hold a special place in the annals of comedy, and as the Twitter age heralds a resurrection of the art form, there seems no better time to celebrate the immortal one-liner. In this riveting read, Times diary columnist Grant Tucker does just that, bringing together 5,000 of the funniest one-liners ever told in one definitive volume. Laugh-out-loud funny, 5,000 Great One-Liners has all the quips, zingers, puns and wisecracks you'll ever need - and a whole lot more.

The demand for energy consumption is increasing rapidly. To avoid the impending energy crunch, more producers are switching from oil to natural gas. While natural gas engineering is well documented through many sources, the computer applications that provide a crucial role in engineering design and analysis are not well published, and emerging technologies, such as shale gas drilling, are generating more advanced applications for engineers to utilize on the job. To keep producers updated, Boyun Guo and Ali Ghalambor have enhanced their best-selling manual, Natural Gas Engineering Handbook, to continue to provide upcoming and practicing engineers the full scope of natural gas engineering with a computer-assisted approach. This must-have handbook includes: A focus on real-world essentials rather than theory Illustrative examples throughout the text Working spreadsheet programs for all the engineering calculations on a free and easy to use companion site Exercise problems at the end of every chapter, including newly added questions utilizing the spreadsheet programs Expanded sections covering today's technologies, such as multi-fractured horizontal wells and shale gas wells

Using circuit diagrams, PCB layouts, parts lists and clear construction and installation details, this book provides everything someone with a basic knowledge of electronics needs to know in order to put that knowledge into practice. This latest collection of Maplin projects are a variety of power supply projects, the necessary components for which are readily available from the Maplin catalogue or any of their high street shops. Projects include, laboratory power supply projects for which there are a wide range of applications for the hobbyist, from servicing portable audio and video equipment to charging batteries; and miscellaneous projects such as a split charge unit for use in cars or similar vehicles when an auxiliary battery is used to power 12v accessories in a caravan or trailer. Both useful and innovative, these projects are above all practical and affordable.
