Histopathology and cytopathology are key diagnostic tests in the initial detection and diagnosis of cancer and other diseases supported by modern molecular techniques. Consultant cellular pathologists are able to provide information on prognosis and help to appropriately direct therapies in post diagnostic treatment.

What is Cellular Pathology? | North Bristol NHS Trust

Cellular pathology, also known as anatomical (or anatomic) pathology is the branch of pathology that involves the study of body organs and tissues (groups of cells). Cellular pathology is considered one of the diagnostic branches of medicine, along with radiology and other pathology specialties (e.g. microbiology, haematology, blood transfusion and biochemistry).

Cellular Pathology | Lab Tests Online-UK

The cellular pathology department provides a comprehensive service in general histopathology, neuropathology, paediatric and perinatal pathology and diagnostic cytopathology. Included in the department are the mortuary and the biomedical imaging unit. The department is integrated with the University of Southampton's department of pathology which has a major role in medical student education, and has active research programs in both applied and basic experimental pathology.

Cellular pathology - UHS

cel-lu-lar pa-thol-o-gy. 1. the interpretation of diseases in terms of cellular alterations, that is, the ways in which cells fail to maintain homeostasis; 2. sometimes used as a synonym for cytopathology (1). Farlex Partner Medical Dictionary © Farlex 2012.

Cellular pathology | definition of cellular pathology by ...

Cellular pathology comprises: cytopathology – the study of cells and how they develop and function. This includes exfoliative cytology and fine needle aspiration. The service carries out more than 26,000 tests on smears each year as well as more than 7,000 other tests to diagnose diseases, including cancer.

Cytopathology (from Greek κυτος, kytos, "a hollow"; παθος, pathos, "fate, harm"; and -λογία, -logia) is a branch of pathology that studies and diagnoses diseases on the cellular level. The discipline was founded by George Nicolas Papanicolaou in 1928. Cytopathology is generally used on samples of free cells or tissue fragments, in contrast to histopathology, which studies whole ...

Cytopathology - Wikipedia

Cellular pathology department In general Cellular Pathology looks at tissues (Histology) or cells (Cytology). Sections within Cellular Pathology include: Andrology - study of male infertility, and confirmation of sterility following male sterilization.

Cellular pathology department | NHS Gateshead

Investigating disease at a cellular level means joining the fight against some of the most serious disorders afflicting humans. We ' ve designed our MSc Cellular Pathology course to enable you to develop an advanced understanding of cellular pathology that you ' ll need in a research or clinical context.

MSc Cellular Pathology · Manchester Metropolitan University

Cellular Pathology is made up of two departments: Histopathology Cytopathology The department provides services to Hospital Clinicians, General Practitioners and Dental Surgeons.

Cellular Pathology - Bedfordshire Hospitals NHS Trust

From April 2021 we will be refining the format of our General Pathology (Routine Histopathology) to improve proficiency testing specificity, and support our participant ' s compliance with ISO 15189. If you have further queries or concerns, or if we can help you with your laboratory quality in any way, then please let us know via our usual email addresses.
