At the first Conference of the Parties of the Climate Convention in Berlin in Spring 1995 it became evident once again: To counteract anthropogenic climate changes, individuals as well as societies have to change their way of thinking and behavior. This accounts for other areas of global environmental change as well. Global trends like soil degradation, loss of biological diversity, water scarcity and population growth show little or no sign of improvement. In fact, in most areas a rapid deterioration has taken place. In its latest Report the German Advisory Council on Global Change describes "Ways Towards Global Environmental Solutions".

Traditions & Encounters offers an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times. Given the diversity of human societies, gathering and organizing the sheer mass of information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class

time is more engaging and effective.
