Post-Keynesian and heterodox economics challenge the mainstream economics theories that dominate the teaching at universities and government economic policies. And it was these latter theories that helped to cause the great depression the United States and the rest of the world is in. However, most economists and the top 1% do not want mainstream theories challenged—for to do so would mean questioning why and how the 1% got where they are. Therefore, numerous efforts have been and are being made to discredit if not suppress Post-Keynesian and heterodox economics. These efforts have had some success; this book is a response to them. This book makes it clear that Post Keynesian/heterodox economics is, in spite of internal problems, a viable and important approach to economics and that it should resist the attempts of the critics to bury it. The reader will also find arguments that directly engage the critics and suggest that their views/criticisms are vacuous and wrong. As such, this will appeal to all who are interested in economic theory, economic history and who believe in challenging the orthodoxy.

This book will teach you how to make a movie that won't break your bank account. Not only will it teach you how to make a movie for little or no money, but will teach you to potentially make a "box office hit" that won't require your first born, and two kidneys to do so. This book will take you through the whole process of filmmaking from Pre-Production, Production, and Post-Production. You'll learn all the key elements in which are forgotten that always cost more money in the long run than originally planned. If you are a first time filmmaker, seasoned professional, or just someone with a dream to make a movie one day, then this book will change your life.

Economic globalization has made national economies susceptible to unpredictable and rapid short-term capital inflows and outflows. This phenomenon, called Hot Money, is the major subject of the paper. The paper focuses on the development of a theoretical model pertinent to the phenomenon. Chapter 1 provides an overview of the topic and the motivation behind the investigation. In Chapter 2, we review the existent literature regarding Hot Money and continue further to review the literature related specifically to the model. Chapter 3 focuses in the effects of financial liberalization on developing countries including the risks and proven benefits. Chapter 4 reviews the literature about Hot Money issues in China while Chapter 5 continues the discussion through the analysis of strategies used in controlling hot money influx in the country. Chapter 6 analyzes the historical crises in Mexico, Thailand, and Russia. Chapter 7, which is the major focus on the paper, entails the derivation of the theoretical model. The model developed supports the proposition that financial liberalization in the presence of fixed foreign exchange regime and weak monetary/fiscal policies culminates in a crisis instigated by the draining of foreign reserves. We conclude in Chapter 8. Chapters 9 and 10 include an appendix to calculating hot money and bibliography, respectively.

The nineteenth century was a time of intense monetization of social life: increasingly money became the only means of access to goods and services, especially in the new metropolises; new technologies and infrastructures emerged for saving and circulating money and for standardizing coinage; and paper currencies were printed, founded purely on trust without any intrinsic metallic value. But the monetary landscape was ambivalent so that the forces unifying monetary practice (imperial and national currencies, global monetary standards such as the gold standard) coexisted with the proliferation of local currencies. Money became a central issue in politics, the arts, and sciences - and the modern discipline of economics was born, with its claim to a monopoly on knowing and governing money. Drawing upon a wealth of visual and textual sources, A Cultural History of Money in the Age of Empire presents essays that examine key cultural case studies of the period on the themes of technologies, ideas, ritual and religion, the everyday, art and representation, interpretation, and the issues of the age.

Successful real estate investments play an essential role in Canadian investors' portfolios. The growth in wealth in real estate markets has presented investors with tremendous opportunities to capitalize on and expand their range of investments, and has moved real estate investing from a niche product to a pillar of smart portfolio diversification. In Making Money in Real Estate, 2nd Edition, Douglas Gray demystifies the Canadian real estate market for novice investors and presents new strategies for veteran investors. Learn to: Understand the real estate market cycles Find a property and assess its investment potential Build a trustworthy real estate team Arrange financing on good terms Use negotiating tactics that work Understand tax and legal issues Manage a property Avoid the pitfalls that many investors fall into Examine the pros and cons of non-residential property investment options Readers of previous editions will appreciate the vital changes to mortgage rules, taxation and legislation, and the inclusion of information on commercial real estate. Thorough coverage in plain English makes Making Money in Real Estate, 2nd Edition the next logical step for investors who want to begin or expand their real estate portfolios, and is a critical and indispensable tool in investment decision making.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. " Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, " Because if you don't get good grades, you won't get into college. " " Regardless of whether I go to college," he replied, " I'm going to be rich. "

You don't make money by just buying and selling real estate, you make money by investing purposefully and knowing where the trends lie in any market. Shazia Virani, a realtor with a "wealth" of personal experience investing in real estate, explains how Canadians can do just that, in achieving their real estate dreams. Virani is a full-time, savvy real estate entrepreneur who has successfully been helping her clients buy, sell and invest in real estate for over a decade. As a highly accomplished real estate investor herself both in Canada and the US, she is dedicated to creating a higher quality of life for her clients, while sharing her vast knowledge and guiding others to accomplish their real estate goals.
