Tuesday Night Bible Study | Pastor Dale Jay Sanders, Sr. How Did the Church Know Which Books to Put in the Bible? **Church And University In The** The Church played a central if not exclusive role in the establishment and encouragement of the university. The substantial output of medieval scholarship that was produced in the twentieth century should have put this inane caricature to rest once and for all, but here we have another case of specialized knowledge that hasn't managed to trickle down to the general public.

~~The Catholic Church and the Creation of the University~~

The Land O' Lakes declaration of 1967 serves as an often-cited declaration of independence from the Church: "The Catholic University today must be a university in the full modern sense of the word, with a strong commitment to and concern for academic excellence. To perform its teaching and research functions effectively the Catholic university must have a true autonomy and academic freedom in the face of authority of whatever kind, lay or clerical, external to the academic community ...

One common stop is the Votive Church, which is the city's second-largest church. The building happens to be steps away from the University of Austria's campus, which made it an ideal building to rent out this semester. Heinrich von Ferstel started building the church in 1856, according to its website. It was finally consecrated in 1979 after 23 years of construction.

Cuninggim distinguishes three phases of the relationship between the college and the church traditions that founded them: (1) church as senior partner, college as junior partner, recognizing the college's need for the church's direct support; (2) a time of equality, when neither college nor church groups has an upper hand of the other in normal situations; and, (3) the college as senior partner, more in control of its own destiny.

Boldly challenges Christians to rethink liberal assumptions about higher education, envisioning a church-centered education.

The book compares the condemnation's ten articles with the major statement of Catholic principles in the first canon of the Fourth Lateran Council, 1215, and assesses what conclusions can be drawn from their apparent correlation.

Christian colleges have been set up by Christian churches throughout American history. But all too often these schools and the groups that support them come into conflict, typically over what is being taught in religion and philosophy classes. Christian College, Christian Calling seeks not so much to resolve this tension between congregation and academy as to explain why it exists and why it might even be fruitful. Instructors of philosophy, theology, church history, Biblical studies, and ministry from Azusa Pacific University explain the value of their disciplines in down-to-earth terms—not in terms of academic achievement but in terms of the Christian life. Looking to get past the stereotypes of liberal, faith-diluting colleges and conservative, unthinking churches, Christian College, Christian Calling provides an invaluable resource for anyone concerned about the mission and relevance of Christian higher education.

Revolution in Mexico sought to subordinate church to state and push the church out of public life. Nevertheless, state and church shared a concern for the nation's social problems. Until the breakdown of church-state cooperation in 1926, they ignored the political chasm separating them to address those problems through education in order to instill in citizens a new sense of patriotism, a strong work ethic, and adherence to traditional gender roles. This book examines primary, vocational, private, and parochial education in Mexico City from 1917 to 1926 and shows how it was affected by the relations between the revolutionary state and the Roman Catholic Church. One of the first books to look at revolutionary programs in the capital immediately after the Revolution, it shows how government social reform and Catholic social action overlapped and identifies clear points of convergence while also offering vivid descriptions of everyday life in revolutionary Mexico City. Comparing curricula and practice in Catholic and public schools, Patience Schell describes scandals and successes in classrooms throughout Mexico City. Her re-creation of day-to-day schooling shows how teachers, inspectors, volunteers, and priests, even while facing material shortages, struggled to educate Mexico City's residents out of a conviction that they were transforming society. She also reviews broader federal and Catholic social action programs such as films, unionization projects, and libraries that sought to instill a new morality in the working class. Finally, she situates education among larger issues that eventually divided church and state and examines the impact of the restrictions placed on Catholic education in 1926. Schell sheds new light on the common cause between revolutionary state education and Catholic tradition and provides new insight into the wider issue of the relationship between the revolutionary state and civil society. As the presidency of Vicente Fox revives questions of church involvement in Mexican public life, her study provides a solid foundation for understanding the tenor and tenure of that age-old relationship.

The late 1960s brought the beginning of a major transition for Catholic colleges and universities. This book examines the shift which transferred governance from the founding religious communities to boards of trustees composed primarily of lay men and women.
