This volume provides a summary of the findings that educational research has to offer on good practice in school science teaching. It offers an overview of scholarship and research in the field, and introduces the ideas and evidence that guide it.

Enable students to construct, communicate and justify correct mathematical arguments with a range of activities and examples of maths in the real world. - Engage and excite students with examples and photos of maths in the real world, plus inquisitive starter activities to encourage their problem-solving skills - Build mathematical thinking with our 'Toolkit' and mathematical exploration chapter, along with our new toolkit feature of questions, investigations and activities - Develop understanding with key concepts and applications integrated throughout, along with TOK links for every topic - Prepare your students for assessment with worked examples, and extended essay support - Check understanding with review exercise midway and at the end of the coursebook Follows the new 2019 IB Guide for Mathematics: analysis and approaches Higher Level

The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in 'What Should Schools Teach?' The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects, but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in their homes.

An exciting textbook for students and teachers of the International Baccalaureate Diploma.

Develop your grade 7 students sentence editing, punctuation, grammar, vocabulary, word study, and reference skills using 180 focused 10- to 15-minute daily activities.

An abridgement of the author's Principles of Psychology. Cf. Pref.

Describes the origins and organization of Britain's main political parties. The book covers the work of constituency associations and agents, and the adoption of parliamentary candidates. Some minor parties and the parties in Scotland, Wales and Northern Ireland are also covered.

Our latest titles offer specific support for Paper 3 of the 2015 History curriculum. Each textbook provides comprehensive coverage of the appropriate topics, equipping students with the knowledge and skills needed to successfully answer essay questions on Paper Three. Written and developed by experienced IB teachers, who also have experience in examining and leading workshops, these new books will help students prepare thoroughly and methodically for their exams. Each of our history textbook is supported by an enhanced eText, giving four years access to online materials such as worksheets, quizzes and enlarged source material to develop examination skills and extend studying. Each textbook provides: A clear overview and analysis of key events. Practice in analysing source material, including photographs, cartoons, letters, speeches and other documents. Support throughout for new curriculum features, including key concepts, ATL, and international mindedness. Approaches to learning highlighted in each activity throughout the book. Focus on the examination requirements, with 'hints for success' throughout, as well as quizzes on the eText. Theory of Knowledge section, matching the latest syllabus, and questions throughout to help with wider research and discussion.
