The CPT code 99291 (critical care, first hour) is used to report the services of a physician providing full attention to a critically ill or critically injured patient from 30-74 minutes on a given date. Only one unit of CPT code 99291 may be billed by a physician for a patient on a given date.

CMS Manual System

More than one physician providing critical care at the same time. CMS does allow for more than one physician of different specialties to provide and bill for critical care during a calendar date. The care must not be duplicative. And, CMS restricts the time period. From the CMS manual:

CPT® and CMS rules for critical care | What's the difference?

Critical care services must be reasonable and medically necessary. As explained above, critical care services encompass both the treatment of "vital organ failure" and "prevention of further life threatening deterioration in the patient's condition." Therefore, delivering critical care in a moment of crisis, or upon being called to the

Critical Care Visits and Neonatal Intensive Care ... - CMS

Critical care codes 99291 (evaluation and management of the critically ill or critically injured patient, first 30-74 minutes) and 99292 (critical care, each additional 30 minutes) are used to report the total duration of time spent by a provider providing critical care services to a critically ill or critically injured patient, even if the time spent by the provider on that date is not continuous.
