Cocoa processing technology | Request PDF

The expansion of the cocoa processing facility was designed in two stages. The first phase included the system for processing cocoa beans into cocoa mass. In an initial operation, the dried, green beans are cleaned, weighed and stored as clean raw material.

The Cocoa Processing Company Ltd - Food Processing Technology

The cocoa industry must intensify production on existing farmland, but technology to do so is limited or out of reach of impoverished farmers. The cocoa sector is crying out for affordable technologies that will improve the efficiency of smallholder cocoa farmers on existing farms. Cocoa farmers must step up production to meet global demand, which is rising 2% a year, but conservation groups say they shouldn ' t do so at the expense of primary forest so call for farming to be intensified on ...
