Written by the holder of several Guinness World Records for cardstacking, this is the first complete, fully illustrated guide to the art of building mind-boggling, multilevel structures with ordinary playing cards. In *Stacking the Deck*, Bryan Berg reveals the secret to successful cardstacking with his simple four-card-cell structure and expanded grid techniques. Using illustrations and step-by-step instructions, he guides readers on to more elaborate -- and incredibly strong -- creations. He covers a wide range of architectural styles, from classic to whimsical, and various types of structures, including pyramids, shrines, stadiums, churches, an oil derrick, and even the Empire State Building. Since first setting the height record in 1992, Bryan's built awe-inspiring card models of a Japanese shrine, the Iowa State Capitol building, Ebbets Field, and his latest tower, which is more than twenty-five feet tall! This book includes photographs of some of these amazing pieces, illustrating just how appealing and enduring a "house of cards" can be. *Stacking the Deck* will inspire everyone from youngsters experimenting with their first deck of cards to adults, who can create their own private skyscrapers. Once you've read *Stacking the Deck*, you'll never look at a deck of cards the same way again.

This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid.

This e-book present some of the most important bridge bidding systems used used in duplicate bridge tournaments, detailing the most known bridge bidding system, Standard American Yellow Card, by using a logical sequential order for openings, answers, competitive bids and defensive play in order to help the players during the games. Much of the complexity in bridge arises from the difficulty of arriving at a good final contract in the auction. A bidding system in contract bridge is the set of agreements and understandings assigned to calls and sequences of calls used by a partnership, and includes a full description of the meaning of each treatment and convention. Standard American Yellow Card is a specific set of partnership agreements and conventions, using Standard American as a base. Standard American Yellow Card is a very specific collection of agreements, which can, of course, be modified and augmented by partnership agreement. In practical use, the term is often mis-used to refer to Standard American in general, or it could refer to a system that used SAYC as a base and made additional augmentations or changes to the base agreements.
