"This book focuses on what qualities distinguish between First-Time Leadership and traditional leaders, while furthering leadership theories that look at other variables such as situational factors, knowledge base, skill levels, etc"--

Volume 1 (A and B) of the Yearbook of International Organizations covers international organizations throughout the world, comprising their aims, activities and events

EXCELLENT RESEARCH METHODS is the 2018 Award Winning Book in Education/Academic/Nonfiction category in the 2018 NEXT GENERATION INDIE BOOK AWARDS that is sponsored by the INDEPENDENT BOOK PUBLISHING PROFESSIONALS GROUP in the United States. The Award Medals and Certificate are attached to this email. This book is absolutely for everyone who is truly interested in identifying and solving an important problem in human life. It has marshaled the entire step-by-step procedures for arriving at empirical solutions to any chosen problem. In virtually every research situation everywhere, for everyone in almost all spheres of human endeavor, at least some of the research methods and designs in this book will work perfectly well. There are no limits to what one can accomplish in knowledge discovery by mastering and correctly applying the research methods thoroughly articulated robustly in this book. Excellent Research Methods serves as a most satisfactory answer to the ever fresh and extremely important question on the minds of numerous persons that beyond introduction, what is research? It guides to ensure that research works are able to completely meet the noble global goal of research, which is problem resolution.

Virtually, all pertinent information on research methods, in the best sense of it, is exhaustively presented in the book. Grab a copy, read it voraciously with undying passion to know, resolute determination to apply, and total commitment to execute research and be reckoned among the great individuals with enormous indelible extraordinary contributions to knowledge advancement.

Tandem Mass Spectrometry - Molecular Characterization presents a comprehensive coverage of theory, instrumentation and description of experimental strategies and MS/MS data interpretation for the structural characterization of relevant molecular compounds. The areas covered include the analysis of drugs, metabolites, carbohydrates and protein post-translational modifications. The book series in Tandem Mass Spectrometry serves multiple groups of audiences; professional (academic and industry), graduate students and general readers interested in the use of modern mass spectrometry in solving critical questions of chemical and biological sciences.

Blended learning continues to emerge as a more proactive and high quality method of teaching and learning. Yet as the academic landscape shifts towards technology-based efforts, the lack of economic support in developing countries has hindered its educational growth. Advancing Technology and Educational Development through Blended Learning in Emerging Economies provides an insight on blended learning approaches and its importance in the educational development of emerging economies. This book is a vital resource for researchers, academics, professionals, and students involved in the management and organizational development of technology use in educational settings.
