Concrete Face Rockfill Dams: Cruz, Paulo Teixeira Da
...

Concrete faced rockfill dams (CFRD) have been widely used for multi-purposes over the world. The construction of CFRD involves placing the higher-grade rock at the dam core, and compacting them to their maximum strength. A reinforced concrete slab is then constructed at the upstream face of the dam.

A Study on Concrete Faced Rockfill Dams

Concrete faced rockfill dams have evolved to a stage where the main elements are common, and a typical cross sections of a CFRDs with sound rockfill on

bedrock and with gravel fill on alluvium are shown at left. Both types of figures are specified in the Code.

Concrete faced rockfill dams in China - International ...
A concrete face rockfill dam (CFRD) is a type of dam that uses rockfill as the support structure and an upstream surface concrete face as the anti seepage structure. CFRDs are effective because of their adaptability to poor topographical, geological, and climatic conditions.

A statistical model of deformation during the

construction ...

Early arch dams were used to be built of rubble ashlar masonry. But now almost all die arch dams are constructed in cement concrete. The arch dams may be of the following three types. 1. Constant Radius Arch Dam. The face of the dam coming in contact with water or upstream face is maintained vertical. In plan dam is circular.
